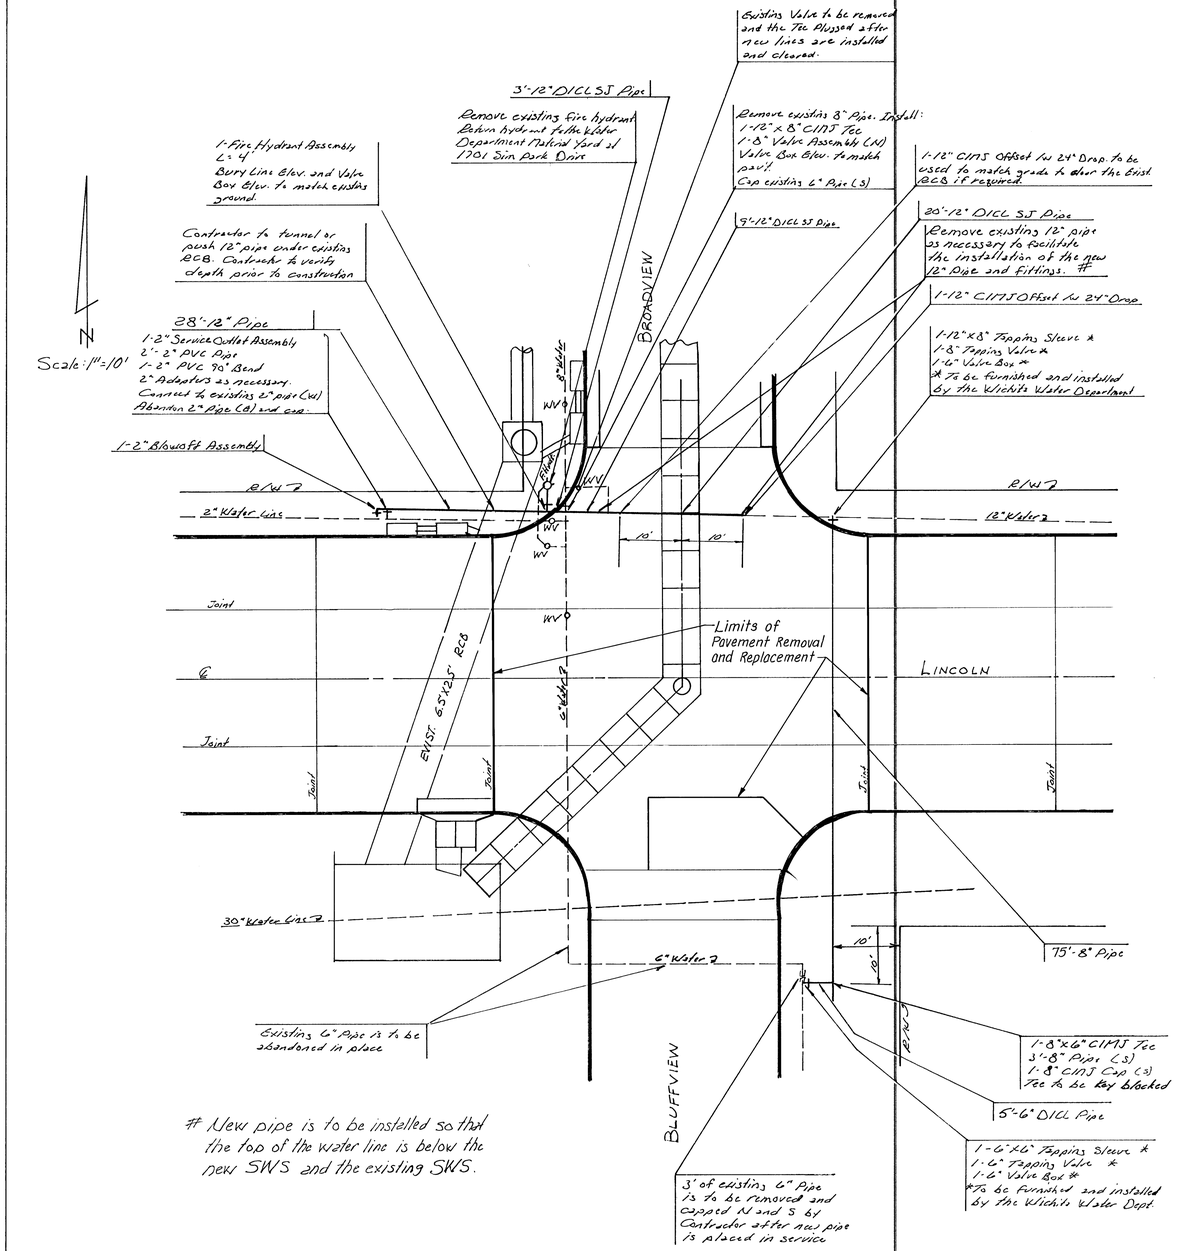
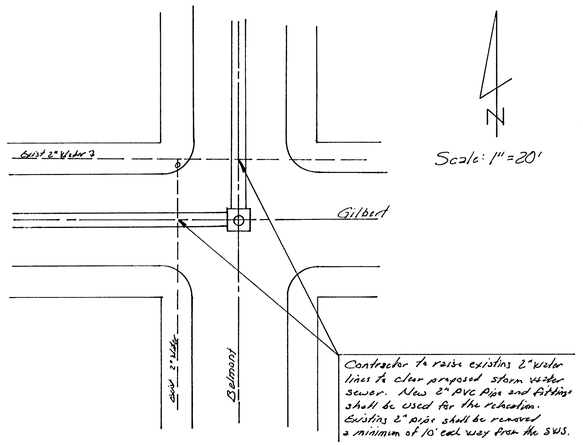
FHWA REGION NO	STATE	PROJECT NO	YEAR	SHEET NO	TOTAL SHEETS
7	KANSAS	54-87 K-4445-01	1996	36	73



New pipe is to be installed so that the top of the water line is below the new SWS and the existing SWS.



NOTE: 1. Contractor shall field verify existing water line locations and elevations prior to construction. New pipe shall be installed to clear the proposed SWS and provide a minimum of 3.5' of cover.

2. For Water Assembly Details, See Sheet 37.

All material an installation methods shall be in conformance with Standard Specification #14533 for the installation of watermains for the City of Wichita.
