Re: BZA2003-00026: Zoning Adjustment to waive the screening requirement along the west property line.

Legal Description: Lot 1, Marantha Addition, Wichita, Sedgwick County, Kansas. Generally located south of 13th Street North and west of Maize Rd. (1161 N. Maize Rd.).

We have reviewed your request for a Zoning Adjustment to waive the screening requirement along the west property line of the aforementioned property. You state in your application that the residentially-zoned property abutting your property to the west contains open space with a water feature, and that you propose not to provide screening between the church and the water feature because the church is designed to utilize the view of the water feature.

Sec. V-I.2.m. of the Unified Zoning Code allows an adjustment to waive the screening requirements specified in Sec. IV-B.3.(a) of the Code when the building is located adjacent to a golf course, public or private park, or open space reserve area of a homeowner's association, the building is architecturally designed to utilize the views of the adjacent property, and the conditions required by Section V-I.6 of the Code are met. We find that waiving the screening requirement along the west property line of the subject property meets the four conditions required by Section V-I.6 of the Unified Zoning Code as set out below:

- 1) Impact on safety and convenience of vehicular and pedestrian circulation: The proposed elimination of screening requirements would have no impact on the safety and convenience of vehicular and pedestrian circulation in the vicinity of the application area.
- 2) Impact on existing uses in surrounding areas: The existing residences located on the other side of the water feature are located more than 225 feet from the church property; therefore, these residential uses should not be adversely impacted by the lack of screening between with church property and the water feature.
- 3) Compatibility with existing or permitted uses on abutting sites: A church is a permitted use in residential areas and the lack of screening between the church and the water feature should not reduce the compatibility of the church with existing or permitted uses on abutting sites.

- 4) Effect on public health, safety or welfare: There will be no encroachment into public utility easements or right-of-way; therefore, there should not be a negative impact on the public health, safety or welfare nor will properties or improvements in the vicinity be materially injured.

Our signatures below indicate that a Zoning Adjustment to waive the required screening on the west property line of the subject property is hereby granted subject to the following conditions:

- 1) The subject property shall be developed in general conformance with the approved site plan.
- 2) The waiver of the screening requirement shall apply only to permit the construction of the improvements illustrated on the approved site plan. The construction of any additional structures or improvements on the subject property shall conform to the screening requirements of the Unified Zoning Code unless a separate Zoning Adjustment or Variance is granted.
- 3) If the Zoning Administrator finds that there is a violation of any of the conditions of the Zoning Adjustment, the Zoning Administrator, in addition to enforcing the other remedies set forth in Article VIII of the Unified Zoning Code, may, with the concurrence of the Planning Director, declare that the Zoning Adjustment is null and void.

The zoning adjustment sign may now be removed from the property.
