RE: S/D 00-11 -- One-Step Final Plat of LEGACY PARK WILSON ESTATES ADDITION

At the regular meeting of the Metropolitan Area Planning Commission on ^{Feb. 10} ~~January 13~~, 2000, the above captioned plat was considered. The action of the Planning Commission was to recommend that the plat be approved as recommended by the Subdivision Committee subject to the conditions stated in our letter of ^{Feb. 4} ~~January 7~~, 2000.

In addition to complying with those conditions, it is necessary that you meet the following requirements before this plat can be forwarded to the City Council and/or County Commission for consideration:

1. Submission of the fully completed and signed tracing of the subdivision, along with four (4) copies, to the Metropolitan Area Planning Department.
2. Submission of a check, made out to the Register of Deeds, covering the costs of any documents to be recorded as a requirement of platting.
3. Subdivision regulations now require a detailed Lot Grading Plan be submitted to Engineering prior to the tracing being released. This applies to all multi-lot and residential developments.
4. Submission of a disk to the Planning Department detailing the final plat in digital format in Autocad. This will be used by the City and County GIS Departments.

RE: S/D 00-11 -- One-Step Final Plat of LEGACY PARK WILSON ESTATES ADDITION

At the regular meeting of the Subdivision Committee of the Metropolitan Area Planning Commission on Thursday, February 3, 2000, the above captioned plat was considered. The action of the Committee was to approve the final plat, subject to:

STAFF COMMENTS:

- A. Municipal services are available to serve the site. City Engineering needs to comment on the need for any guarantees or easements. No additional guarantees are required.
- B. If improvements are guaranteed by petition, a notarized certificate listing the petitions shall be submitted to the Planning Department for recording.
- C. City Engineering needs to comment on the status of the applicant's drainage plan. The drainage plan is approved.
- D. The plat proposes six access openings along Webb Road and three openings along 21st Street North in accordance with the approved CUPs. The access controls referenced in the plat's text shall be corrected to note "Lot 1, Block 1". Distances shall be shown for all segments of access control. Access openings located within 250 feet of the intersection of 21st Street North and Webb Road are limited to right turns only, or a guarantee provided for future construction of a raised medial.
- E. A joint access easement between Lots 3 and 4, Block 1, shall be established by separate instrument.
- F. A Cross-Lot Circulation Agreement between the non-residential lots in the plat shall be provided.
- G. In accordance with the CUP's, the applicant shall provide a guarantee for the following traffic improvements: a) A deceleration lane for southbound Webb Road traffic at Wilson Estates Parkway; b) a left turn lane for northbound Webb Road traffic at Wilson Estates Parkway; c) a

deceleration lane for eastbound traffic on 21st North; and d) left turn lanes for eastbound and westbound traffic at 21st Street North and Greenleaf for entrance into Lot 1, Block 1 and the residential subdivision north of 21st Street North.

- H. Provisions shall be made for ownership and maintenance of the proposed reserves. The applicant shall either form a lot owners' association prior to recording the plat or shall submit a covenant stating when the association will be formed, when the reserves will be deeded to the association and who is to own and maintain the reserves prior to the association taking over those responsibilities.
- I. The applicant shall submit an Avigational Easement covering all of the subject plat and a restrictive covenant assuring that adequate construction methods will be used to minimize the effects of noise pollution in the habitable structures constructed on subject property.
- J. The applicant shall submit a copy of the instrument which establishes the pipeline easements on the property, which verifies that the easements shown are sufficient and that utilities may be located adjacent to and within the easements.
- K. The applicant's agent shall determine any setback requirements for the pipelines by researching the text of the pipeline agreements. If a setback from the pipeline easements is provided for in the pipeline easement agreements, it shall be indicated on the face of the plat.
- L. The applicant shall provide a guarantee for paving of Wilson Estates Parkway.
- M. A CUP Certificate shall be submitted to MAPD prior to City Council consideration, identifying the approved CUPs (referenced as DP-200 and DP-201) and their special conditions for development on this property.
- N. The plat's text shall include language that a drainage plan has been developed for the plat and that all drainage easements, rights-of-way, or reserves shall remain at established grades or as modified with the approval of the applicable City or County Engineer, and unobstructed to allow for the conveyance of stormwater.
- O. The applicant shall install or guarantee the installation of all utilities and facilities which are applicable and described in Article 8 of the MAPC Subdivision Regulations. (Water service and fire hydrants required by Article 8 for fire protection shall be as per the direction and approval of the Chief of the Fire Department.)
- P. The applicant's engineer is advised that the Register of Deeds is requiring the name(s) of the notary public, who acknowledges the signatures on this plat, to be printed beneath the notary's signature.
- Q. To receive mail delivery without delay, and to avoid unnecessary expense, the applicant is advised of the necessity to meet with the U.S. Postal Service Growth Management Coordinator (Phone: 316-729-0102) prior to development of the plat so that the type of delivery, and the tentative mailbox locations can be determined.
- R. The applicant is advised that various State and Federal requirements (specifically, but not limited to, the Army Corps of Engineers, Kanopolis Project Office, Rt. 1, Box 317, Valley Center, KS 67147) for the control of soil and wind erosion and the protection of wetlands may impact how

this site can be developed. It is the applicant's responsibility to contact all appropriate agencies to determine any such requirements.

- S. The owner of the subdivision should be aware of the fact that the development of any subdivision greater than five (5) acres in size may require a NPDES Storm Water Discharge Permit from the Kansas Department of Health and Environment in Topeka. Further, on all construction sites, the City of Wichita requires that best management practices be used to reduce pollutant loadings in storm water runoffs.
- T. Perimeter closure computations shall be submitted with the final plat tracing.
- U. Recording of the plat within thirty (30) days after approval by the City Council and/or County Commission.
- V. The representatives from the utility companies should be prepared to comment on the need for any additional utility easements to be platted on this property.
- W. The applicant is reminded that a disk shall be submitted with the final plat tracing to the Planning Department detailing this plat in digital format in AutoCAD. This will be used by the City and County GIS Department.

If this plat requires the guaranteeing of improvements a list of the five methods which have been adopted as being acceptable is available through the Planning Department. Also, certificates which are required if petitions are submitted and forms for the bond and irrevocable Letter of Credit are also available from this office.

The enclosed "marked" copy of the final plat is for your information and files.

This matter will be forwarded to the Planning Commission for its consideration on Thursday, February 10, at 12:00^{2:30} p.m.

If you have any questions concerning this matter, please call.

Sincerely,

Neil Evan Strahl, Senior Planner
Current Plans Division
