

- 1) Impact on safety and convenience of vehicular and pedestrian circulation: The proposed expanded and reconfigured site plan/equipment compound should have no impact on the safety and convenience of vehicular and pedestrian circulation in the vicinity, as it is located well behind and away from any vehicular and pedestrian circulation in the vicinity.
- 2) Impact on existing uses in surrounding areas: There should be no negative impact on the existing uses in surrounding areas as a result of the proposed adjustment. The proposed 29-foot x 23-foot addition to the equipment compound and the 25% increase in the height of the monopole is needed for the additional antenna panel for AT&T. The proposed 25% increase in the height of the monopole for the additional antenna panel meets the co-location standards of the Wireless Master Plan, which is intended to reduce the number of towers in the Wichita-Sedgwick County community, while providing the community with its service needs.
- 3) Compatibility with existing or permitted uses on abutting sites: CON2006-00044, a Conditional Use for a wireless communication facility was found to be compatible with the area's character, which was described as having a variety of industrial uses at the arterial intersection and having sufficient buffers in setbacks and vegetation between the 85-foot tower and the nearby residential areas. The proposed expansion of the site/equipment compound by another 29-foot x 23-foot and the tower to 106 feet does greatly increase its presence.
- 4) Effect on public health, safety or welfare: There should be no negative impact on the public health, safety or welfare, nor will properties or improvements in the vicinity be materially injured.

Our signatures below indicate that an Administrative Adjustment for a 29-foot x 23-foot addition to the equipment compound and the 25% increase in the height of the monopole is needed for the additional antenna panel for AT&T on the aforementioned property is hereby GRANTED, subject to the following conditions:

- (1) All conditions of CON2006-00044 will remain, with the exception of allowing a 29-foot x 23-foot addition to the equipment compound and the 25% increase in the height of the monopole from 85 feet to 106 feet to allow the additional antenna panel.
- (2) The applicant shall obtain all permits, reviews and inspections necessary for the above noted changes to CON2006-00044.
- (3) All requirements of Section III.D.6.g. of the Unified Zoning Code shall remain in effect.
- (4) The site shall be developed in general conformance with the approved site plans and elevation drawings. All improvements shall be completed before the facility becomes operational.
- (5) The site shall be developed and operated in compliance with all federal, state, and local rules and regulations.

(6) If the Zoning Administrator finds that there is a violation of any of the conditions of the Administrative Adjustment, the Zoning Administrator, in addition to enforcing the other remedies set forth in the Unified Zoning Code, may, with the concurrence of the Planning Director, declare that the Administrative Permit is null and void.

The zoning adjustment sign may now be removed from the property.

Wichita, KS, 67205

CON2013-00010 – City request for an Administrative Adjustment to CON2006-44, to allow an expansion of the LC Limited Commercial (“LC”) zoned wireless communication site, generally located on the south side of 21st Street North and west of Maize Road (10709 W 21st Street North, CUP DP-184).

Legal: See attached site plan

Dear Sir:

We have reviewed your request for an Administrative Adjustment to the site plan of CON2006-44, which will reconfigure the existing 50-foot x 40-foot equipment compound by adding another 29-foot x 23-foot to the equipment compound to allow more on ground equipment to accommodate an additional antenna panel for AT&T.

Your application also shows the monopole to increase 25% in height from 85 feet to 106 feet. The Wireless Master Plan, Sec. VI.A.1.c., allows; “Modification and/or replacement of wireless communication facilities, including cumulative height extension of up to 25% above the original structure height that comply with the compatibility height standards of the Unified Zoning Code (“UZC”). CON2006-00044’s site plan showed the 85-foot tall tower to be 116 feet from the abutting SF-5 Single-Family Residential (“SF”) zoned property. The monopole’s proposed extension to 106 feet still conforms to the UZC’s compatibility height standards; UZC Art IV, Sec IV-C.5

Art. V, Sec. V-D.14 of the UZC states that the Planning Director, with the concurrence of the Zoning Administrator, may approve minor adjustments to approved Conditional Use site plans or conditions of approval, unless finding that the proposed development would have one or more of the negative impacts stated in Sec. V-1.6, as set out below:
