Re: S/D 96-8 WEBB ROAD COMMERCIAL (Final Plat)

Gentlemen:

At the regular meeting of the Metropolitan Area Planning Commission on March 14, 1996, the above captioned plat was considered. The action of the Planning Commission was to recommend that the plat be approved as recommended by the Subdivision Committee subject to the conditions stated in our letter of March 7, 1996.

In addition to complying with those conditions, it is necessary that you meet the following requirements before this plat can be forwarded to the City Council for consideration:

1. Submission of the fully completed and signed tracing of the subdivision to the Metropolitan Area Planning Department.

2. Submission of a check, made out to the Register of Deeds, covering the costs of any documents to be recorded as a requirement of platting.

3. Subdivision regulations now require a detailed Lot Grading Plan be submitted to Engineering prior to the tracing being released. This applies to all multi-lot and residential developments.

Please call if you have any questions.

Sincerely,

Don Losew

Re: S/D 96-8 WEBB ROAD COMMERCIAL (Final Plat)

Gentlemen:

At the regular meeting of the Subdivision Committee of the Metropolitan Area Planning Commission on Thursday, March 7, 1996, the above captioned plat was considered. The action of the Committee was to recommend that this plat be approved subject to:

A. Prior to this plat being submitted to the City Council for review, DP-200 shall be, as determined appropriate, adjusted or amended so that parcel boundaries correspond to the lots now being platted.

B. The applicant shall guarantee the extension of City water to serve the lots being platted.

C. The applicant shall guarantee the extension of sanitary sewer to serve the lots being platted. Also, off-site easements as needed shall be provided by the applicant for such sewer improvements.

D. As noted by DP-200 and Traffic Engineering, the applicant shall guarantee the construction of a continuous accel/decel lane along the east street frontage (Webb Road) of the plat.

E. The applicant shall guarantee any drainage improvements required by the platting of this property.

F. If improvements are guaranteed by petition, a notarized certificate listing the petitions shall be submitted to the Planning Department for recording.

G. The final plat tracing shall indicate the access controls requested by Traffic Engineering. Complete access control shall be shown from Lot 1 to 21st Street in the western portion of the lot where an existing catch basin is located. For Lot 2, 100 feet of complete access control shall be shown to Webb southward from this lot's northeast corner. The three openings to Webb for Lots 1 and 3 shall be distributed such that one opening will be

shared between these lots, with one full opening to each lot.

J. The joint access easement for Lots 1 and 2 should be recorded by the applicant. The recording information shall then be indicated on the final plat tracing and a copy of the recorded instrument submitted to Planning for the plat file. A similar instrument would be recommended for the above noted joint opening for Lots 2 and 3.

I. As this site is in the process of having a pipeline easement (blanket) confined, the final plat shall as needed indicate any such easement if it is located on this site (plat). A recorded copy of the document confirming this easement shall be submitted to Planning. As appropriate, the final plat tracing shall label the easement and show its recording information.

The applicant's agent shall determine any setback requirements from the pipeline by researching the text of the pipeline agreement. If a setback from the pipeline easement is provided for in the pipeline easement agreement, it shall be indicated on the face of the plat.

J. Any relocation, lowering or encasement of the pipeline, made necessary by this development, will not be at the expense of the City.

K. Also based upon the platting binder, the 2nd half of 1995 property taxes were outstanding on this site. Before this plat can be released for recording, proof shall be provided that all applicable property taxes have been paid.

L. The applicant shall submit an avigational easement covering all of subject plat and a restrictive covenant assuring that adequate construction methods will be used to minimize the effects of noise pollution in the habitable structures constructed on subject property.

M. The applicant shall install or guarantee the installation of all utilities and facilities which are applicable and described in Article 8 of the MAPC Subdivision Regulations. (Water service and fire hydrants required by Article 8 for fire protection shall be as per the direction and approval of the Chief of the Fire Department.)

N. The applicant's engineer is advised that the Register of Deeds is requiring the name(s) of the notary public, who acknowledges the signatures on this plat, to be printed beneath the notary's signature.

O. Perimeter closure computations shall be submitted with the final plat tracing. Section 5-101(c).

P. Recording of the plat within 30 days after approval by the City Council.

If this plat requires the guaranteeing of improvements a list of the five methods which have been adopted as being acceptable is available through the Planning Department. Also, certificates which are required if petitions are submitted and forms for the bond and irrevocable Letter of Credit are

also available from this office.

The enclosed "marked" copy of the final plat is for your information and files.

This matter will be forwarded to the Planning Commission for its consideration on Thursday, March 14, 1996 at 1:30 p.m. If you have any questions concerning this matter, please call.

Sincerely,

Don Losew
