

- 2) Compatibility with existing or permitted uses on abutting sites: The increased height of the sign should not make the sign incompatible with future development on adjacent properties, as the sign is tasteful in design and is of an appropriate scale in relation to the size of the property.
- 3) Effect on public health, safety or welfare: There will be no encroachment into public utility easements or right-of-way; therefore, there should not be a negative impact on the public health, safety or welfare nor will properties or improvements in the vicinity be materially injured.

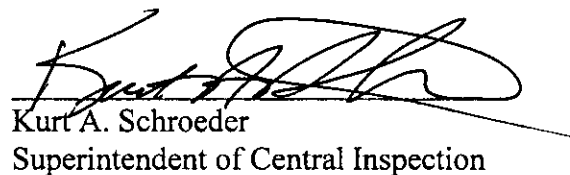

Our signatures below indicate that a Sign Code Adjustment to increase the maximum allowed height of a ground sign from 30 feet to 35 feet is hereby granted, subject to the following conditions:

- 1) There shall be only one ground sign permitted on the subject property. Said sign shall comply with all Sign Code regulations except that it shall be permitted at a maximum height of 35 feet. Said sign shall generally conform to the location, size, and design of the approved site plan and elevation drawing.
- 2) If the Zoning Administrator finds that there is a violation of any of the conditions of the Zoning Adjustment, the Zoning Administrator, in addition to enforcing the other remedies set forth in the Unified Zoning Code, may, with the concurrence of the Planning Director, declare that the Zoning Adjustment is null and void.

The "Development Application" sign should now be removed from the property.

RE: BZA2005-00024: Sign Code Adjustment to increase the maximum allowed height of a ground sign from 30 feet to 35 feet.

Legal Description: Lots 2, 4, 6, 8, 10, 12, & 14, on Douglas Avenue, Allen's Subdivision, Wichita, Sedgwick County, Kansas. Generally located south of Douglas and west of Hillside (2809 E. Douglas).

Dear Mr. Soper:

We have reviewed your request for a Sign Code Adjustment to increase the maximum allowed height of a ground sign on the aforementioned property. From reviewing your application, we understand that you propose to construct the sign for a convenience store on the property. You submitted exhibits that illustrate that the view of the proposed sign at the maximum permitted height is blocked by a building sign for an adjacent business that projects over the right-of-way. Since it is important that at least a portion of the convenience store sign be visible to motorists along Douglas, you propose that the sign be 35 feet in height rather than the 30 feet in height permitted without an adjustment.

Section 24.04.251.2.b. of the Sign Code allows an adjustment to increase the maximum height of on-site signs by up to 20 percent when the three conditions required by Section 24.04.251.6. of the Sign Code are met. We find that increasing the height of the sign as proposed meets the three conditions required by Section 24.04.251.6. of the Sign Code as set out below:

- 1) Impact on existing uses in surrounding areas: The immediate area is predominately developed commercial uses along the Douglas frontage. Increasing the permitted height of the sign should not adversely impact the existing uses since the increase in sign height is minor and is needed to avoid a confusing sign display that would result from one sign blocking the view of another.
