Re: S/D 93-9 - STERLING FARMS 2ND ADDITION (Final Plat)

Dear Mr. Wiley:

At the regular meeting of the Metropolitan Area Planning Commission on March 11, 1993, the above captioned plat was considered. The action of the Planning Commission was to recommend that the plat be approved as recommended by the Subdivision Committee subject to the conditions stated in our letter of March 5, 1993.

In addition to complying with those conditions, it is necessary that you meet the following requirements before this plat can be forwarded to the City Council for consideration:

1. ✓ Submission of the fully completed and signed tracing of the subdivision to the Metropolitan Area Planning Department.
2. ✓ Submission of a check, made out to the Register of Deeds, covering the costs of any documents to be recorded as a requirement of platting.
3. Subdivision regulations now require a detailed Lot Grading Plan be submitted to Engineering prior to the tracing being released. This applies to all multi-lot and residential developers.

Please call if you have any questions.

Sincerely,

Bruce Peshoff
Associate Planner

Gatewood, Wichita, KS 67206
Mike Lindebak, City Engineer

determined.

- T. Perimeter closure computations shall be submitted with the final plat tracing. Section 5-101(c).
- U. Recording of the plat within 30 days after approval by the City Council.
- V. The final plat shall indicate the utility easements requested by K.G.& E. which are indicated on the enclosed "marked" copy of the plat.

METROPOLITAN AREA PLANNING COMMISSION

March 11, 1993

STAFF REPORT
(Final Plat Approved 3/4/93)

CASE NUMBER: S/D 93-9 - STERLING FARMS 2ND ADDITION

OWNER/APPLICANT: Kessler Enterprises, a Trust, c/o William J. Walsh, Jr., 1440 Gatewood, Wichita, KS 67206

SURVEYOR/ENGINEER: P.E.C., c/o Gary Wiley, 303 South Topeka, Wichita, KS 67202

LOCATION: West of Tyler Road and north of 21st Street North

SITE SIZE: 18.8 Acres

NUMBER OF LOTS

Residential:	53
Office:	
Commercial:	
Industrial:	
Total:	53

MINIMUM LOT AREA: 8,000 sq. ft.

CURRENT ZONING: "AA" (DP-178)

VICINITY MAP:

STAFF COMMENTS:

- A. The applicant shall guarantee the extension of sanitary sewer to serve the lots being platted.
- B. The applicant shall guarantee the extension of City water to serve the lots being platted.
- C. The applicant shall guarantee any drainage improvements required by the platting of this property.
- D. The applicant shall guarantee construction of the storm sewers required by this plat.
- E. The applicant shall guarantee the paving of the proposed interior streets.
- F. Based upon an overall sidewalk plan submitted by the applicant, sidewalk needs to be guaranteed along Sterling. This sidewalk was intended to extend from Tyler Road along the south side of Sterling until reaching a system of Reserves planned to the south. At that point, the sidewalk was to branch southward into the Reserves and northward across to the north side of Sterling and then continuing westward along Sterling until it connected up with the sidewalk to be installed with the first Sterling Farm Addition.
- G. As provided for in general provision 18 of CUP, DP 178 at the time of platting, the applicant shall submit a guarantee that provides for this plat to pay for his proportionate share of the construction costs for the paving of adjacent Tyler Road to a two lane arterial street standard. A similar guarantee was required for the 1st Sterling Farm Addition, and involved Tyler Road just north of 21st Street North.
- H. If improvements are guaranteed by petition, a notarized certificate listing the petitions shall be submitted to the Planning Department for recording.
- I. Provisions shall be made for ownership and maintenance of the proposed reserves. The applicant shall either form a lot owners' association prior to recording the plat or shall submit a covenant stating when the association will be formed, when the reserves will be deeded to the association and who is to own and maintain the reserves prior to the association taking over those responsibilities.
- J. For those reserves being platted for drainage purposes, the required covenant which provides for ownership and maintenance of the reserves shall grant, to the City, the authority to maintain the drainage reserves in the event the owner(s) fail to do so. The covenant shall provide for the cost of such maintenance to be charged back to the owner(s) by a method similar to special

assessments.

- K. The above covenant shall also provide that the home owners association will maintain the "parking strip" or open space area between Tyler Road's pavement and this plat's east line.
- L. The applicant shall submit a covenant which provides for four (4) off-street parking spaces per dwelling unit on each lot which abuts a 58-foot street. The covenant shall inventory the affected lots by lot and block number and shall state that the covenant runs with the land and is binding on future owners and assigns.
- M. Although Sterling is platted with a 58-foot right-of-way, it is being considered as functioning as a collector since residential lots are being platted so as not to front on or have access directly on to this street. As with the previous Sterling Farm Addition, however, this is conditioned on parking not occurring on this street. As with the previous Addition, the applicant shall submit a covenant that obligates the Homeowners' Association to install no parking signs if conditions occur which warrant such an action.
- N. Although the plattor's text indicates that utilities can be installed in each Reserve, within easements, none of the Reserves indicate an easement. The final plat tracing should either indicate easements within the Reserves as appropriate, or the plattor's text should be amended, i.e., drop references to utilities within the Reserves or make the Reserves blanket easements.
- O. Prior to this plat being released for recording, the applicant should provide proof that all applicable property taxes have been paid.
- P. On the final plat tracing, the building setback lines should be clearly labeled and dimensioned. As shown, it is not clear if a 20 or 25-foot front yard setback is intended. Although a reference to the CUP is provided, the plat should clearly label and establish setbacks for this residential plat.
- Q. The applicant shall install or guarantee the installation of all utilities and facilities which are applicable and described in Article 8 of the MAPC Subdivision Regulations.
- R. The applicant's engineer is advised that the Register of Deeds is requiring the name(s) of the notary public, who acknowledges the signatures on this plat, to be printed beneath the notary's signature.
- S. To receive mail delivery without delay, and to avoid unnecessary expense, the applicant is advised of the necessity to meet with the U.S. Postal Service Growth Management Coordinator (phone 316-946-4527) prior to development of the plat so that the type of delivery, and the tentative mailbox locations can be
