Every reasonable effort has been made to assure the accuracy of the maps and associated data provided herein. This information is provided with the understanding that the data are susceptible to a degree of error, and conclusions drawn from such information are the responsibility of the reader. The City of Wichita makes no warranty, representation or guaranty as to the content, accuracy, timeliness or completeness of any of the data provided herein. Some data provided here and used for the preparation of these maps has been obtained from public records not created or maintained by the City of Wichita. The City of Wichita shall assume no liability for any decisions made or actions taken or not taken by the reader in reliance upon any information or data furnished hereunder. The user should consult with the appropriate departmental staff member, e.g. Planning, Parks & Recreation, etc. to confirm the accuracy of information appearing in the visual presentations accessible through these web pages.

- 3) Effect on public health, safety or welfare: There will be no encroachment into public utility easements or right-of-way; therefore, there should not be a negative impact on the public health, safety or welfare nor will properties or improvements in the vicinity be materially injured.

Our signatures below indicate that a Sign Code Adjustment to increase the maximum allowed height of a ground sign from 27 feet to 32 feet is hereby granted, subject to the following conditions:

- 1) Signage on the property shall comply with all Sign Code regulations except that it shall be permitted at a maximum height of 32 feet. Said sign shall generally conform to the location, size, and design of the approved site plan and elevation drawing.
- 2) If the Zoning Administrator finds that there is a violation of any of the conditions of the Zoning Adjustment, the Zoning Administrator, in addition to enforcing the other remedies set forth in the Unified Zoning Code, may, with the concurrence of the Planning Director, declare that the Zoning Adjustment is null and void.

The "Development Application" sign should now be removed from the property.

RE: BZA2006-00011: Sign Code Adjustment to increase the maximum allowed height of a ground sign from 27 feet to 32 feet.

Legal Description: Lots 1, except the S 170' and except parts dedicated, Casado-Walker Addition, Wichita, Sedgwick County, Kansas. Generally located south of W. Kellogg and west of S. Tyler (8909 W. Kellogg).

Dear Mr. Strong:

We have reviewed your request for a Sign Code Adjustment to increase the maximum allowed height of a ground sign on the aforementioned property. From reviewing your application, we understand that you propose to add signage to an existing pole sign on the property. The submitted exhibits illustrate removal of existing signage, and increased sign height to 32', above the permitted 30'. The exhibits also demonstrate a total of 180 square feet of signage, on two signs, for the entire lot.

Section 24.04.251.2.b. of the Sign Code allows an adjustment to increase the maximum height of on-site signs by up to 20 percent when the three conditions required by Section 24.04.251.6. of the Sign Code are met. We find that increasing the height of the sign as proposed meets the three conditions required by Section 24.04.251.6. of the Sign Code as set out below:

- 1) Impact on existing uses in surrounding areas: The immediate area is predominately developed commercial uses along the Kellogg frontage. Increasing the permitted height of the sign should not adversely impact the existing uses since the increase in sign height is minor.
- 2) Compatibility with existing or permitted uses on abutting sites: The increased height of the sign should not make the sign incompatible with future development on adjacent properties, as the sign is tasteful in design and is of an appropriate scale in relation to the size of the property.
