RE: CUP2022-00058 – Administrative Adjustment in the City to the Normandie Center CUP DP-193 to reduce the landscape buffer along the north property line from 17 feet to 6 feet, generally located on the northeast corner of North Woodlawn Boulevard and East Central Avenue.

Legal Description: Lot 1 and Reserve A, Normandie Center Addition, Wichita, Sedgwick County, Kansas.

Dear Applicants:

We received and reviewed your request for an Administrative Adjustment to the Normandie Center CUP #193 to modify General Provision #19.A to reduce the size of the landscape buffer along the north property line from 17 feet to 6 feet in order to improve vehicular circulation and parking along the abutting service drive. The new modifications are listed in bold, italicized text as follows:

19. Landscape Buffers:

- A. A 5' landscape buffer shall be required along the south and west property lines. A ~~17'~~ ***6-foot*** landscape buffer shall be required along the north property line, and a landscape buffer (varying in size- see plan) shall be required along the east property line. Additional landscaping shall be required in the island south of the loading dock area.

On the basis of our review, we find that adjusting CUP #193 in the manner stated above is consistent with the approved CUP and will not have an adverse effect on the CUP or adjacent properties, nor will it be a substantial deviation of the original plan. Support of this include the existence and requirement to maintain a 6-foot screening fence along the north property line as required by General Provision 17 of the CUP.

The Wichita Landscape Ordinance requires a 15-foot landscape buffer along rear and side property line between commercial and residential zoning districts. The Ordinance specifically states that it does not require 15 feet of landscaping, but that all landscaping must be planted within the 15 feet of the property line. Much of the existing landscaping is planted within the first six (6) feet of the residential property line.

Our review of the item concluded that the landscaping indicated on the proposed plan is existing, and the reduction of the required width of the landscape buffer is not changing the amount of landscaping that was provided with the original landscape plan. It is our understanding that the additional parking is likely to be used for employees and service use, and the request for the reduction is not due to a new use within the shopping center.

Our signatures below indicate that CUP DP-193 shall be adjusted as stated in this letter subject to the following conditions: This adjustment shall not be deemed to alter any other provisions of the CUP except as expressly stated herein.

1. A landscape plan illustrating the revised six (6)-foot landscape buffer shall be submitting to the Planning Department for review and approval prior to the issuance of any permits regarding altering the configuration of the service drive.

The "Development Application" sign should now be removed from the property. Please submit four (4) new copies and one (1) electronic copy of the revised CUP drawing within 60 days in order for this adjustment to be considered final.

On the basis of our review, we find that adjusting the CUP in the manner stated above is consistent with the approved CUP and will not have an adverse effect on the CUP or adjacent properties, nor will it be a substantial deviation of the original plan.

Re: CUP2023-00023: Administrative Adjustment in the City to the Normandie Square Community Unit Plan CUP DP-193 to reduce drive-thru queuing requirements and permit a canopy to extend into building setback on property zoned LC Limited Commercial District; generally located on the northeast corner of East Central Avenue and North Woodlawn Boulevard.

Legal Description: Lot 1, Normandie Center Addition, Wichita, Sedgwick County, Kansas.

Dear Applicants,

We have reviewed your request for an Administrative Adjustment to reduce the drive-thru queuing requirements for an existing coffee shop and permit a canopy over the drive-thru pick-up window to extend 30 inches into the building setback along North Woodlawn Boulevard. It is our understanding that the reason for this request is to permit the drive-thru to continue to operate as it has historically and to permit the improvement to the building without having to vacate a portion of a platted setback. Specifically, the request is as follows with requested text change in red and bold.

Parcel 1:

Proposed Uses: Neighborhood Shopping Center Uses including Grocery Store, Furniture, Restaurants, Retail Shops, Offices, Medical and Dental Clinics, Clothing Stores, Pharmacies, Dry Cleaning, Laundry (not including self service laundry), Barber Shops, Beauty Shops, Tailors, Studios, Shoe Stores, Hardware and Appliance Stores, Convenience Stores, and Financial Institutions.

Net Area: 355,631 Sq. Ft. (8.2 Acres)

Maximum Building Coverage: 104,500 Sq. Ft (29%)

Maximum Gross Floor Area: 104,500 Sq. Ft.

Floor Area Ratio: 0.294

Maximum Building Height: 35'

Maximum Number of Buildings: 3

Setbacks: See General Provision Number 3, *provided that a drive-thru pick-up window canopy may project into the setback along Woodlawn by up to 30 inches per Section III-E.1.e(1)(g) of the UZC*

Parking: See General Provision Number 8

Total parking required (4 Parking Spaces per 1,000 Sq. Ft. of maximum gross floor area = 418. Total parking shown on plan = 463. A total of 4 handicapped parking stall shall be required, see plan).

Drive-thru queuing along the west end of the main building does not have to meet the minimum queuing requirements of 6 vehicles behind the order box per approval by the Traffic Engineer.

On the basis of our review, we find that adjusting the CUP in the manner stated above is consistent with the approved CUP and will not have an adverse effect on the CUP or adjacent properties, nor will it be a substantial deviation of the original plan. The drive-thru configuration at this location has existed for a number of years without causing issues with vehicular access and/or circulation within the development or along North Woodlawn Boulevard. A pay window is being added to the drive-thru lane which should increase efficiency of the drive-thru to help ensure timely cycling of vehicles through the lane.

Our signatures below indicate that the CUP shall be adjusted as stated in this letter. This CUP adjustment shall not be deemed to alter any other provisions of the CUP except as expressly stated herein.

The "Development Application" sign should now be removed from the property. Please submit four (4) copies of the revised CUP drawing within 60 days in order for this adjustment to be considered final.

The "Development Application" sign should now be removed from the property.

Property owners may file written protest petitions on zoning related items or appeals on Community Unit Plan items heard by the MAPC. In order to be considered a "valid" petition, the signatures must reflect the correct and entire ownership of the property, the property must be at least partially within 200 feet of the property for which the application was filed (or have standing to appeal for Community Unit Plan appeals), and must be submitted to the City Clerk within 14 days of the conclusion of the MAPC hearing, by **February 24, 2011, at 5 PM.** Such petitions may cause the City Council to review the decision of the MAPC, and either reverse their decision or return the matter to the MAPC for reconsideration.

If there are no valid appeals or protest petitions filed opposing this action by **February 24, 2011**, the action of the MAPC will be considered final. If appeals or protest petitions are filed, you will be advised of the date your application will be forwarded to the Governing Body for review and final action.

The zoning adjustment sign(s) should now be removed from the property. If you have any questions concerning this case, please contact our office.
