

This recommendation is based on the following findings:

1. The zoning, uses and character of the neighborhood: Nearby properties are zoned "SF-5," Single-family Residential or "LC," Limited Commercial and developed with residential or office uses. The area is located adjacent to a four-lane arterial road.
2. The suitability of the subject property for the uses to which it has been restricted: The site is zoned "GO," General Office which allows a variety of medium to low intensity uses, ranging from single-family residences, multi-family residential to general and medical offices. The site is already developed with buildings suitable for office or small-scale retail use. The site could continue to be used as currently restricted, however personal improvement services should not be unsuitable uses given the site's orientation and location along an arterial road.
3. Extent to which removal of the restrictions will detrimentally affect nearby property: Approval of the request should not detrimentally affect nearby properties. Given the site's small size, existing development and building orientation, nearby property should not experience any detrimental affects.
4. Relative gain to the public health, safety and welfare as compared to the loss in value or the hardship imposed upon the applicant: Approval would increase the number of locations personal improvement services could be located. Denial presumable would result in an economic loss to the applicant.
5. Conformance of the requested change to the adopted or recognized Comprehensive Plan and policies: The "2030 Wichita Functional Land Use Guide" map identifies this area as appropriate for "local commercial" uses, which include concentrations of predominately commercial, office and personal service uses that do not have a significant regional market draw. The Comprehensive Plan also recommends that office uses should be generally located adjacent to arterial streets, and they should be incorporated within or adjacent to neighborhood and community scale commercial development. This location is consistent with the recommended guidelines.
6. Impact of the proposed development on community facilities: No negative impacts on community facilities have been identified.
