

LEGEND

- Telephone or Telegraph line
- Power line
- Gas line
- Fence
- Railroad
- Road
- County Highway
- U.S. Highway
- Creek or drain
- Water surface (D&P survey)
- River bank line
- Contour
- Depression contour
- Building
- Trees
- Orchard
- Woodlot
- Section corner
- Right of way, this contract
- Bench Mark (see 11)
- Alignment P.T., this contract
- P.O.I.
- Survey boring
- Existing trees on site
- Levee and abut., this contract
- Levee by others
- Limit of waste disposal
- Channel, this contract
- Channel, by others
- Rip rap
- Bridge
- Culvert

- NOTES**
1. For detailed plan & profile of floodway see sheets C121-188 thru C121-192.
 2. For plan & profile, masonry & reinforcing details of control structure see sheets C121-185 thru C121-190.
 3. For location and details of normal structures see sheets C121-186, C121-188, C121-189 and C121-190.
 4. For special sections of floodway see sheets C121-187.
 5. For location of water bays see sheets C121-188 thru C121-190.
 6. For water gate locations see sheets C121-188 and C121-189.
 7. For detailed details see sheets C121-188 thru C121-190.
 8. Location of stone gate cutting structures see sheets C121-187 and C121-188.
 9. Existing fences, utility lines, buildings, culverts and bridges, which are shown, are to be removed by others.
 10. All railroad, telephone and county road relocations are to be constructed by others.
 11. Elevation and location of bench marks in feet referred to mean sea level and based on the datum C121-188 (see sheet C121-188).
 12. Topographic data on sheets C121-188 thru C121-192, was obtained by topographic survey by through Dec. 1942. The contractor shall verify, himself, by field examination as to what topographic changes have occurred since completion of the survey.
 13. Distance points and estimated quantities are shown on C121-188 thru C121-192, may vary and are not guaranteed by the U.S. Government.
 14. Conditions of material furnished are given in appropriate minimum required depths and may be changed to suit local conditions as required.
 15. Figures in circles indicate the proposed flow, color which material to be made, this 10.
 16. Levee closures, indicated on plan & profile sheets as work to be done by others, are to be located from limits of the design and limits of disposition furnished as shown on this drawing.
 17. Where section is shown as being other than long, where taken it is indicated that the numeral indicates the day on which the section is shown.
