To Serve Lots 1 Through 52 Inclusive In Westwind 2nd Addition

PROJECT NO.

472-76-245-81775-000-000-001

Index Code

760066

GENERAL NOTES

- Utility service lines, poles, valve boxes, meters, and etcetera are to be adjusted as necessary by others prior to construction unless the plans specifically call for their adjustment by the Contractor or unless the plans specifically identify a utility to be adjusted by its owner during construction. Existing utilities and their location, as shown on the plans, represent the best information obtainable for design. The contractor will be required to work around existing utilities within the right-of-way which do not conflict with proposed construction.
- Rubble from the removal of miscellaneous structures and excess excavation which is to be wasted shall be disposed of on sites to be provided by the Contractor. These sites shall be approved by the Engineer as to suitability, appearance and site location. Locations that, in the opinion of the Engineer, will leave an unsightly appearance will not be approved.
- This project does not include any provisions for construction of driveways.
- The Contractor will be permitted to bid only one of the alternate types of subgrade treatment. The type bid by the successful bidder will be the type of subgrade treatment used to construct the project.
- The Contractor is to provide one open traffic lane in each direction on 21st Street for the duration of this project.
- The Contractor shall provide adequate traffic control per MUTCD standards throughout the construction of this project.
- The Contractor shall be responsible for preserving property irons. The Contractor will be required to re-establish any property irons which are damaged or destroyed by his construction operations. Such irons shall be re-established by a licensed land surveyor in accordance with state laws.

ADDITION

1. All pavement markings shall conform to standards set forth in the Manual on Uniform Traffic Control Devices.
2. All pavement markings shall be the "cold-laid" Plastic Tape (white & yellow) type, meeting the required specifications of the Engineering Div., City of Wichita.
3. Installation of marking tapes on other than new A.C. pmt. (i.e. concrete, existing A.C. surface) shall be in accordance with installation specifications for cold-laid markings.
4. Where new A.C. pavement is being constructed, the new pavement markings must be installed while the new wearing surface is still warm (at least 130°F) and rolled, so as to inlay the pavement markings into the new pavement.
