

GENERAL NOTES

1. Underground utility service lines and overhead utility pole lines are to be adjusted as necessary by the utility prior to construction unless it is plans and specifications specifically intent to relay to be adjusted by its owner during construction. Existing utilities and their location, as shown on the plans, represent the best information obtainable to date. The Contractor will be required to work around existing utilities within the right-of-way which do not conflict with proposed construction.

2. Trees and shrubs in public right-of-way which do not affect conflict with proposed new construction shall be removed by the Contractor and the Contractor's salvage trees and shrubs which are not in direct conflict with proposed new construction shall be saved and protected from damage.

3. The Contractor shall be responsible for maintaining adequate flow of sewage through existing sewers. Contractor's proposed method for routing or controlling flow shall be approved by the Engineer. Cost of maintaining flow of sewage through sewers shall not be paid for directly and this cost shall be considered as subsidiary to the other pay items of work.

4. The Contractor shall be responsible for protecting property pins. The Contractor will be required to re-establish any property pins which are damaged or destroyed by his construction operations. Such pins shall be re-established by a licensed land surveyor in accordance with state law.
