

FHWA REGION NO.	STATE	PROJECT NUMBER	FISCAL YEAR	SHEET NUMBER	TOTAL SHEETS
7	KANSAS	87N-0493-01	2012	2	59

HSPJ Proj. No. N049 (301)

- Underground utility service lines and overhead utility pole lines are to be adjusted by utility companies if necessary prior to construction unless the plans specifically call for their adjustment by the Contractor. Existing utilities and their location, as shown on the plans, represent the best information obtainable for design. The Contractor will be required to work around existing utilities within the right-of-way which do not conflict with proposed construction.
- Rubble from the removal of miscellaneous structures and excess excavation which is to be wasted shall be disposed of on sites to be provided by the Contractor. These sites shall be approved by the Engineer as to suitability, appearance and site location. Locations that, in the opinion of the Engineer, will leave an unsightly appearance will not be approved.
- All disposal sites must be approved by the Kansas Department of Health and Environment. Material either stockpiled or disposed of in a flood plain would require a Kansas State Board of Agricultural permit. Any material dumped in waters of the United States or wetlands is subject to U.S Corps of Engineers permitting regulations. Any material buried or stockpiled beyond approved construction limits would require additional archaeological investigations unless buried in a previously approved borrow location.
- The Contractor shall give all property owners and/or tenants of developed property abutting the construction of this project a minimum of ten (10) days notice prior to start of construction and again 48 hours prior to any work actually starting.
- The Contractor shall be responsible for preserving property irons. The Contractor will be required to re-establish any shown property irons which are disturbed by his construction operations. Such irons shall be re-established by a licensed Land Surveyor in accordance with state laws. The city will re-establish any survey monuments that are removed by the construction of this project.
- Contractor is required to provide a minimum notice of forty-eight (48) hours to utility companies prior to starting any excavation as follows:

Kansas One-Call 316-687-2470 or 1-800-DIG-SAFE

The Contractor must notify the following before construction and in case of an emergency.

Cox Communications	262-0661
Kansas Gas Service	1-888-482-4950
Westar	383-8600
Black Hills Energy	1-800-303-0357
AT&T	1-800-286-8313
City of Wichita Water Department	268-4555
City of Wichita Sewer Maintenance	268-4555

- Trees and shrubs to be removed are marked . Trees or shrubs marked for removal, which in the opinion of the Engineer can be saved, shall be spared. Tree and shrub disposal areas and disposal methods shall be approved by the Engineer.
- Provide a full depth saw cut at locations where proposed construction abuts an existing surface course or pavement for which partial removal of that surface or pavement is required. Sawed joints to facilitate removal within three (3) feet of the existing joint will not be permitted and for such instances the limits of removal shall extend to the existing joint. Such saw cuts will not be paid for directly and this cost shall be considered as subsidiary to the removal of the surface or pavement.

- All salvageable drainage pipes, manhole rings and covers, inlet grates and traffic control equipment, cabinet, controllers, etc. shall be carefully removed and delivered to the Central Maintenance Facility at 1801 S. McLean. (Non-Participating Item)
- Connection of proposed storm sewer to existing storm sewer and existing structure shall be Subsidiary to new pipe being connected to. Also pipe plugs to be Subsidiary to the project.
- Driveways replaced with this project shall be a minimum of 12' in width.
- Neither the City of Wichita nor the contractor shall be responsible for moving and resetting fences that are on the public right of way. The property owner shall be notified prior to construction to move the fence. If the fence is not removed by the time of construction, the contractor shall remove the fence and it will become the property of the contractor.
- Contractor shall maintain two-way traffic during the project for the entire length of the project. All Traffic control shall be Subsidiary to the bid item 'Traffic Control'.
- The Contractor shall adjust Water Valve Boxes and Fire Hydrants as directed by the Engineer at the price bid for said adjustments. The Water Department shall field locate water valves one time during construction when requested by the Contractor. It shall be the Contractor's responsibility to preserve such field locations during the construction process. Water valves, water valve boxes or fire hydrants damaged during construction shall be repaired by the Contractor at his own expense.
- The Contractor shall not disturb Monitor Wells.
- Contractor to protect all trees in the right-of-way and on private property from damage to the trunk and limbs from construction activity. Tree pruning shall be performed by L.S.A. or state certified arborist only. Contractor shall be responsible for disposal of all tree debris generated from tree pruning or removal work. Contractor will notify project engineer if heavy root pruning results from construction activity and a determination on tree removal or pruning needs will be made by project engineer and City Arborist. No trees shall be removed until marked by the Engineer or Park Department
