WATER GENERAL NOTES

- All water mains and appurtenances shall be installed in accordance with City of Wichita, Kansas Standard Specifications for Water Main Installations.
- Opening and closing of water valves shall be done slowly to prevent damage to the distribution system by water hammer. All valves that are closed by the Contractor must be reopened as new construction permits. The Project Inspector must ascertain that any valve closed by the Contractor is reopened. The Contractor will be permitted to operate a water valve only when the Project Inspector assigned to the project is present.
- The Contractor shall return all salvageable valves, hydrants fittings, and etc. to the City of Wichita Water Distribution Department Yard located at 1825 S. McLean Blvd. The Contractor shall be required to have all salvaged material checked in by the Storekeeper.
- Existing water mains and service connections are to remain in service until proposed new mains have been completed and tested. Some services found to be abandoned may require a new main connection and meter setter to allow for future business activity. The Contractor shall verify with the Water Dept. those services which are to be reconnected. All services found with two meters in one meter box shall be replaced with individual meter boxes.
- All Existing Utilities crossing the Water Line trench not in conflict with the Water line shall be relocated, replace, or supported by the contractor. Such work shall not be paid for directly.
- All abandoned water services encountered by the Contractor shall be exposed at the corporation on the water main and shut off. Water service tubing will be separated from the corporation and the meter box, ring & lid will be removed from the meter setter. The Contractor will provide measurements for the corporation in relation to the center line of the nearest streets. Any service not shown on the plans that are discovered during construction will require verification from the City before abandonment. All cost associated with the work shall be *SUBSIDIARY* to the Measured Quantity "Water Service Abandonment, 1" and Smaller".
