

TYPICAL SECTION -- DUAL PAVEMENT

SEEDING PERIODS

SODDING PERIODS

Temporary seeding shall be done during any time of the year that the soil can be cultivated. After the temporary seeding has been completed on the entire project, a permanent seeding shall be done by another project during the normal seeding season.

FERTILIZER: A ratio and application rate that equals or exceeds the required minimum rate per hectare of N, P₂O₅, K₂O listed in Summary of Quantities will be acceptable.

Prairie Hay	3,900 - 5,000	Kilograms per Hectare	= 40mm loose depth spread uniformly over hectare.
Bromegrass	3,900 - 5,000	Kilograms per Hectare	= 40mm loose depth spread uniformly over hectare.
Wheat or Oats Straw	3,400 - 4,500	Kilograms per Hectare	= 80mm loose depth spread uniformly over hectare.
Wood Chips	9,000 - 11,200	Kilograms per Hectare	= 25-50mm loose depth spread uniformly over hectare.
Wood Fiber	1,700 - 2,200	Kilograms per Hectare	= loose depth spread uniformly over hectare.
Other vegetative mulches (Acceptable only with the Engineer's concurrence).			

The amount of mulch in the bid quantities is estimated. The total mulch required shall be determined in the field. The bid item for mulching shall be paid for by one of the following ways: A) Plan quantity as shown on Summary of Quantities, Seeding Sheet or Water Pollution Control Sheet, B) Slope measurement as measured in field, or C) Dril measurement less 5% as measured at the time of seeding.

SUMMARY OF SEEDING QUANTITIES

SHLDR = Shoulder Turf Mix: Includes a 4 meter wide strip along the stabilized shoulder on each side of each traveled way, plus all median areas less than 18 meters wide.

OTHER = All other turf areas.
