General Notes:

Refer to Sht. 68 for identification of signs for handling traffic through construction.

Refer to Sht. 66 for dimensions.

Paving operations will be phased at entrances to allow continued use of the points of access.

Lane closure will be limited to one land at a time. Multiple Closure is shown here for information only.

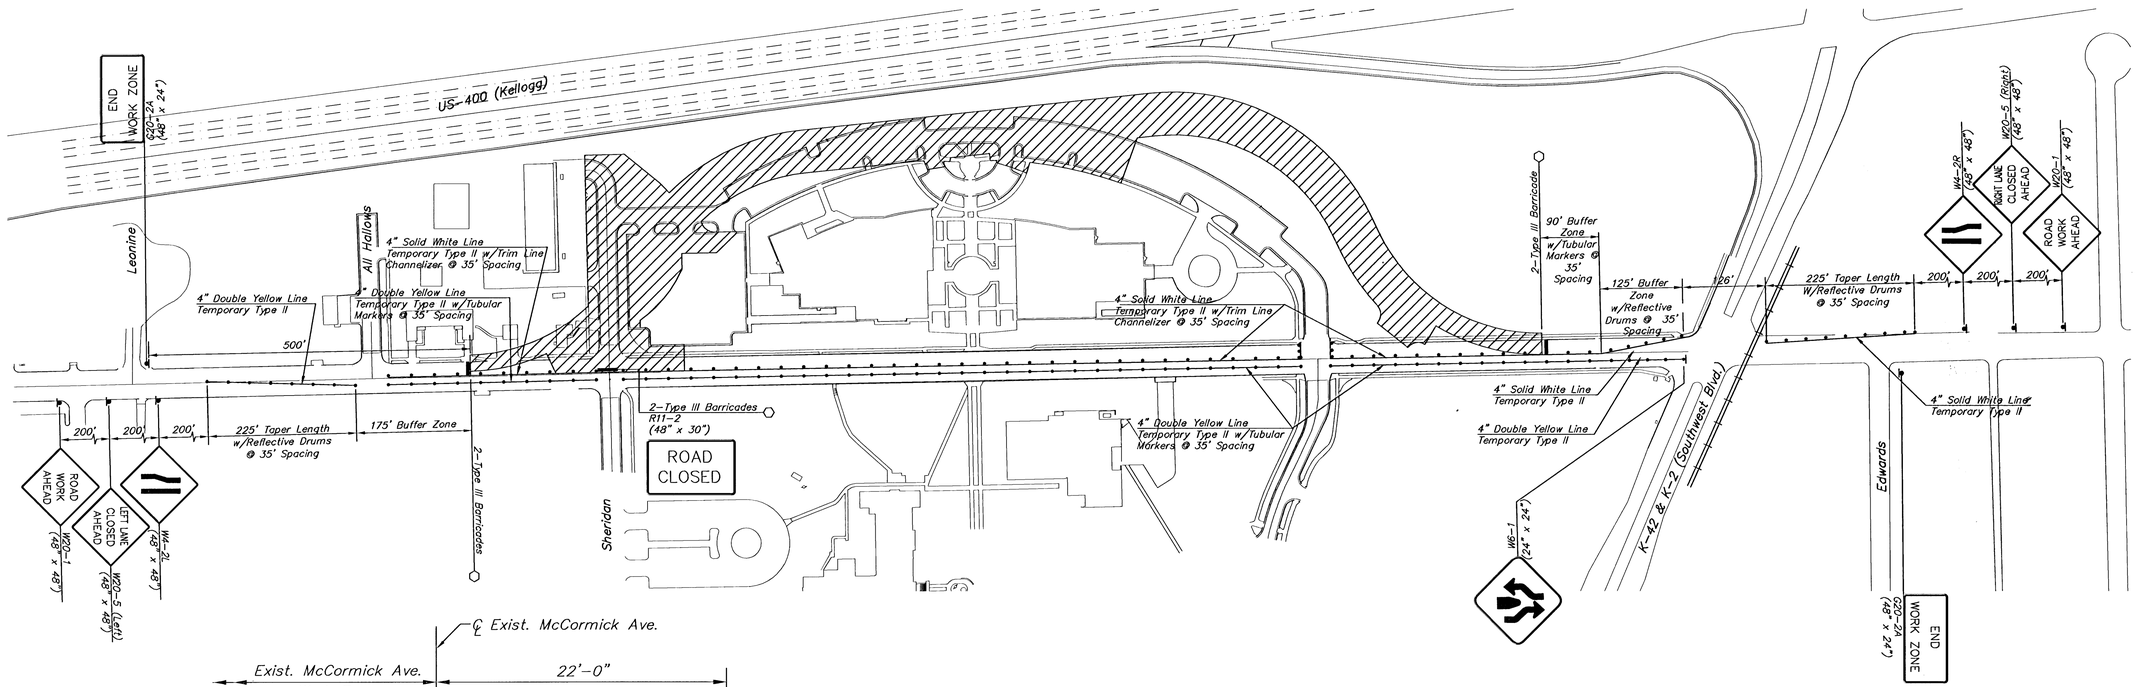

Refer to Typical Side Street Closure details for side street and entrance traffic control as necessary.

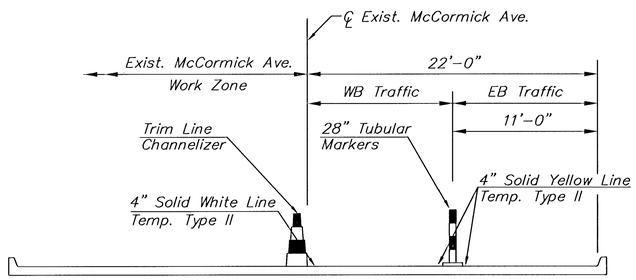

In areas where the width of existing McCormick Avenue does not allow for construction and two-directional traffic flow as shown on this drawing, Contractor may remove a portion of curb and gutter and provide the required width with temporary asphalt pavement. Asphalt shall be removed and curb and gutter replaced upon completion of the construction phase.
