

The image contains two cross-sectional diagrams of concrete joint construction, labeled "EXPANSION JOINT" and "CONTROL JOINT".

EXPANSION JOINT: This diagram shows a vertical joint in a concrete slab. A "JOINT SEALER" is installed at the top of the joint. Above the joint, there is a "NON-EXTRUDING EXPANSION JT. MATERIAL" and a "FIBER MESH REINFORCEMENT". The joint is filled with "1\" MAX. SAND LEVELING COURSE" and "COMPACTED FILL OR UNDISTURBED SOIL". Dimensions include a 2" gap on the left, a 1/2" gap at the top of the joint, and a 4" gap at the bottom of the joint.

CONTROL JOINT: This diagram shows a vertical joint in a concrete slab. A "FIBER MESH REINFORCEMENT" is shown above the joint. The joint is filled with "1\" MAX. SAND LEVELING COURSE" and "COMPACTED FILL OR UNDISTURBED SOIL". Dimensions include a 2" gap on the left, a 1.5" gap at the top of the joint, and a 4" gap at the bottom of the joint.
