Subject: Proposed Easement for Sanitary Sewer to Serve Building 6G
Private Project No. 643 PPS (607861)

In order to preserve the maximum flexibility for future expansion and development, Learjet would prefer to retain ownership and maintenance responsibility for the sanitary sewer line being added to serve our Flight Test Hangar, Building 6G, now under construction, rather than grant the easement proposed. The line will be engineered, constructed and maintained according to city standards. If you have questions, or if something more is required of Learjet in order to proceed please let me know at 946-2309.

Thank you for your assistance.

A handwritten signature in cursive script that reads "Mike Butler".
