July 22, 1993

City Engineers Office  
Attn: Mike Lindebak  
455 North Main, 7th Floor  
Wichita, Kansas 67202

Mr. Mike Lindebak:

Let this letter serve as our formal request to initiate a change order for the storm sewer project in the Reflection Ridge 9th Addition.

Due to concerns of insufficient irrigation water storage I am requesting that the static pool elevation be raised from 140.8 to 142.3. PEC contacted the city storm sewer subcontractor on July 9, 1993 explaining this request and that the current outlet structure would need to be substituted with a 4' by 2' area inlet using a top elevation of the 142.3. The contractor said this would be no cost difference and that as long as this had the cities approval there would be no problem in initiating this change.

Should you need any additional information or have any questions regarding this request contact either Marvin Schellenberg at 721-2153 or Mike Berry at 262-2691.

Respectfully submitted,

REFLECTION RIDGE, INC.
