PLEASE ADVISE IMMEDIATELY OF ANY MISCONCEPTIONS OR OMISSIONS YOU BELIEVE TO BE CONTAINED HEREIN.

Thank you for meeting with Mr. Higgins and myself this morning. We appreciate your letting us present our problem concerning the change in geometry stipulated by the City Engineer and the Traffic Engineer as necessary for the intersection of Freeman Lane and Summitlawn Lane if the proposed development project to be called Farmington Square is allowed to proceed.

This Memo is to confirm your general agreement with our proposal to change the south corner of Lot 19 in Block F of Country Acres 6th Addition from a 90° corner to a 50 foot radius, thus allowing the street intersection to be planned for a 65 foot radius (to back of inside curb) in lieu of the presently planned 90° intersection with a 30 foot radius (maximum).

Our proposal includes the condition that the developer of the property to the south of the existing LHA homesites in this area would guarantee those construction costs stipulated by the MAPC and the Board of City Commissions during platting of the property.

We understand that your agreement is with respect to the character and geometry of the proposed changes as they affect Lot 19 Block F which is administered by the LHA, and that all legal agreements will be negotiated with the City of Wichita Department of Law. Please note that we are forwarding copies of this Memo to the other City officials involved for their information.

Thank you again for your consideration.

W. H. Keltner

W. H. Keltner, P. E.
