

THE CITY OF WICHITA

OFFICE OF ENGINEERING

DATE March 18, 1976

TO M. S. Mitchell - Flood Control

FROM Donald E. Schneider, Drainage and Sanitary Engineer

SUBJECT Farmington Square Addition

The Engineering Department is in the process of preparing plans for drainage improvements and street paving in the above noted addition.

A channel is to be constructed along the south side of Wayside Lane to the Big Slough. This channel crosses Shade Lane just south of Wayside Lane. Please advise this office as to what size and type of structure should be provided for the channel crossing at Shade Lane. Pavement grades and channel flow elevations limits the height of any such structure to four (4) feet or less.

Donald E. Schneider
Drainage and Sanitary Engineer
