

**THE CITY OF WICHITA**

OFFICE OF City Engineer

DATE August 17, 1983

TO Jack Galbraith, Chief Planner - Current Plans

FROM Mike Lindebak, City Engineer

SUBJECT Proposed Plat - The Harbors -  
135th Street West and Kellogg

Art Chambers presented the proposed mobile home park at the subject location for comments with regard to sanitary sewer service.

As you are aware, the annexation of areas in West Wichita, including The Del, West Millbrook, C. Pate Wheatridge and other areas are still under litigation. The CIP indicates that the City will proceed with construction of sanitary sewer mains to serve those areas upon favorable decision from the courts on annexation.

Sewer service to The Harbors could be included with the construction of mains to serve the above areas as indicated in the CIP.

The CIP indicates that the design would occur in one year, right-of-way the following year and construction in the third year.

In addition, you are aware that the Cowskin Interceptor Sewer Study is in progress. The results of that study will also be useful in sizing and scheduling any additional sewer improvements in the Cowskin Drainage Basin.

Please advise if you have any questions.

  
Mike Lindebak  
City Engineer
