Thank you, let me know if we can assist.
Contact is Crystal Cox 683-8996 ↔ Turtle Creek Apts.

*Called 4-3 11:00
She called back 4-3 11:24
Talked to her 4-3 4:00 pm. She will
talk to Doug about Se. Lake. N. Lake
is private. Tell her we'd help by
picking up after herself.
Went to take her to
do is pump
down.

We'll coordinate with them. We can use the clean up fund for this. Larry, will you educate Bob and Chris on this? Doug, who is the contact person.

The ponds are in platted reserves and are supposed to be owned and maintained by Williamsburg

Landowners Association. I do not know whether the Association is in existence. County's record shows that the reserves "A" & "B" are owned by Reliable Health Systems Inc. - developer?

I think I have asked this question before, but I have slept since getting the answer. At or near our Claude Lambe Park there is a retention pond, the neighbors are complaining that it is full of junk. Is this yours ours or the subdivisions? Are we willing to assist the neighborhood in cleaning it out, if they organize volunteers?

We really don't own this, but considering the history of this with Frank Smith and the fishing dock provided by the City this whole issue is more muddy than the pond. what is needed for help? Trucks, men/women, roll offs?????

We can provide roll offs.

Chris, if they want to do a neighborhood clean-up, we can provide roll-off boxes to dispose of the trash. Get with Randy Thome (4079) if they want to do this.

Subject: Joyce Barton Concern - Turtle Creek Area Lakes

Sensitivity: Private

FYI - The lakes in question were originally platted as reserve areas to be maintained by a homeowners association. I understand that there is no such critter so maintenance is up in the air. I know storm water does not maintain the lakes - don't know who mows them. I asked Doug Kupper to check to see if Parks does. There is some evidence that Parks may have claimed some control over the south lake in the past - Doug will see.

In general, we believe that these lakes are in private ownership and any cleanup should be organized by the neighborhood. I've been in contact with a Crystal Cox, manager of the complex, and told her that we would pick up the trash when they are done or perhaps furnish a roll off box beforehand.

Thats where we are fyi.

Subject: Citizen Concern
Sensitivity: Private

I need some help guys. I am not sure if this concern would only affect one department, or additional departments.

I received a call from Mrs. Joyce Barton, who lives at 1020 N Harding. She is concerned that trash continues to get into the pond that is bordered by the Turtle Creek complex near 13th and Oliver. She said that she often sees trash left on City property and believes the trash is coming from the residents at Turtle Creek.

Mrs. Barton is also concerned that ultimately she will be held responsible for the clean-up. What can I tell her? Will she be solely responsible? Is there anything she can do to alleviate the situation?

Please advise. Any information you provide would be greatly appreciated.

Thanks!

Heidi Drew
