**RE: DUGAN WEST KELLOGG COMMERCIAL ADDITION
Drainage Plan
Wichita, Sedgwick County, Kansas**

To Whom It May Concern:

At the time of site development of the proposed above referenced addition, the site engineer will need to design sufficient areas to comply with all current water quality and channel protection requirements.

These requirements (WQv & CPv) can be fulfilled in the platted Reserve as well as on-site in site specific engineering stormwater management controls or devices. All calculations and designs must adhere to the current (as of site development) standards set forth by the City of Wichita's Storm Water Manual.

Sincerely,
Baughman Co., P.A.

Trevor R. Kurth, P.E. CFM
Water Resources Engineer
