VICINITY MAP

SUB 2012-00002 – Final Plat of MEL HAMBELTON 2ND ADDITION
March 29, 2012 - Page 2

NOTE: This is a replat of the Blasi Park Addition in addition to unplatted property.

STAFF COMMENTS:

- A. City of Wichita Public Works and Utilities Department advises that water and sewer services are available to serve the site.
- B. If improvements are guaranteed by petition(s), a notarized certificate listing the petition(s) shall be submitted to the Planning Department for recording.
- C. City Stormwater Management has approved the drainage plan subject to additional language being included on the plat or restrictive covenant to clarify the maintenance requirements for Reserve B. At the time of redevelopment, the site Civil Engineer will be required to ensure the plan meets the specific requirements of Chapter 16.32 of the City Code.
- D. In the surveyor's certificate, the reference to "K.S.A. 12-512(b)" should read "K.S.A. 12-512b."
- E. Traffic Engineering has approved the proposed access controls. The plat proposes four openings along Kellogg Drive.
- F. The owner's certificate needs corrected to include the name of the Addition.
- G. The applicant shall guarantee the closure of any driveway openings located in areas of complete access control or that exceed the number of allowed openings. A Driveway Closure Certificate in lieu of a guarantee may be provided.
- H. Provisions shall be made for ownership and maintenance of the proposed reserves. A covenant shall be submitted regarding ownership and maintenance responsibilities.
- I. For those reserves being platted for drainage purposes, the required covenant that provides for ownership and maintenance of the reserves, shall grant to the appropriate governing body the authority to maintain the drainage reserves in the event the owner(s) fail to do so. The covenant shall provide for the cost of such maintenance to be charged back to the owner(s) by the governing body.
- J. The plat or restrictive covenant shall include language that a drainage plan has been developed for the plat and that all drainage easements, rights-of-way, or reserves shall remain at established grades or as modified with the approval of the applicable City or County Engineer, and unobstructed to allow for the conveyance of stormwater.
- K. The applicant shall install or guarantee the installation of all utilities and facilities that are applicable and described in Article 8 of the MAPC Subdivision Regulations. (Water service and fire hydrants required by Article 8 for fire protection shall be as per the direction and approval of the Chief of the Fire Department.)
- L. The Register of Deeds requires all names to be printed beneath the signatures on the plat and any associated documents.
- M. Prior to development of the plat, the applicant is advised to meet with the United States Postal Service Growth Management Coordinator (Phone: 316-946-4556) in order to receive mail delivery without delay, avoid unnecessary expense and determine the type of delivery and the tentative mailbox locations.
- N. The applicant is advised that various State and Federal requirements (specifically but not limited to the Army Corps of Engineers, Kanopolis Project Office, Rt. 1, Box 317, Valley Center, KS 67147) for the control of soil and wind erosion and the protection of wetlands may impact how this site can be developed. It is the applicant's responsibility to contact all appropriate agencies to determine any such requirements.
- O. The owner of the subdivision should note that any construction that results in earthwork activities that will disturb one (1) acre or more of ground cover requires a Federal/State National Pollutant Discharge Elimination System Stormwater Discharge Permit from the Kansas Department of Health and Environment in Topeka. Also, for projects located within the City of Wichita, erosion and sediment control devices must be used on ALL projects. For projects outside of the City of Wichita, but within the Wichita metropolitan area, the owner should contact the appropriate governmental jurisdiction concerning erosion and sediment control device requirements.

- P. Perimeter closure computations shall be submitted with the final plat tracing.
- Q. A compact disc (CD) should be provided, which will be used by the City and County GIS Departments, detailing the final plat in digital format in AutoCAD. Please include the name of the plat on the disc. If a disc is not provided, please send the information via e-mail to Kathy Wilson (e-mail address: kwilson@wichita.gov).
