Scott,

Attached is the updated Drainage Plan and the Hydraflow Hydrographs for the detention and site runoff. The Water Quality calculations are shown on the plan sheet. We are still finalizing the Grading Plan and should have that to you guys at the first of next week (working with a pipeline along the east ROW that isn't very deep).

Let me know of any questions or concerns you have.

Thanks.

trk

I do not recommend submitting a revised drainage report, I would only submit amendment to the water quality calculations, detention calculations, updated drainage plan sheet, and updated master grading plan.

Please let me know if that will work with your schedule.

Thank you

Scott

Scott,

We filed a plat last week for a re-plat of Woods North. A street was changed and some storm sewer, but the ponds and such are relatively the same. I have a Drainage Plan sheet and am working on the Grading Plan – do we need to do another Report for this as the proposed use of the property is the same as before?

I re-routed the ponds due to an orifice outlet and will also re-model the storm sewer. I also will provide water quality calcs.

Let me know, not a huge deal but looks like I am running out of time on this one.

trk
