Multimedia Presentation: Powerpoint

Background: The applicant has requested industrial zoning on an 80-acre unplatted tract currently zoned SF-20 Single-family Residential, located approximately one-half mile south of 31st Street South on the west side of 103rd Street West (Maize Road), in order to offer additional large-scale shovel-ready industrial property in proximity to the airport and K-42. Currently, the property is in agricultural use, with a salt-water remediation well located on the site. The applicant originally requested LI Limited Industrial zoning but indicated agreement with IP Industrial Park zoning with a protective overlay at the MAPC meeting held July 20, 2006. The IP district was recommended by MAPC instead of LI because of the advantages it offers for protecting residential uses from more intensive industrial activities and with higher performance standards, plus the greater complementarities of the IP district with the airport.

Two distinct areas surround this site. The land to the north and west is in agricultural or low-density residential use; to the south it is a single-family residential subdivision, Harvest Ridge Addition. Harvest Ridge has 165 single-family lots platted, 38 lots occupied or under construction and 245 approved as part of a preliminary plat. The unincorporated community of Schulte is located to the southwest of Harvest Ridge Addition. St. Peter the Apostle Catholic Church and school is located in this community. The area east of Maize Road is zoned LI and is a large industrial area, anchored by the Wichita Mid-Continent Airport and Cessna Aircraft. A freight terminal is located on the northwest and northeast corners of K-42 and 103rd Street West (Maize Road) and the remaining land north of K-42 is vacant.

The subject tract is one-half mile west of the property owned by Wichita Airport Authority and over one-half mile west of the area labeled 'Airfield, Approach Protection (AO)' of the "Airport Land Use Legend" (Airport Layout Plans for Wichita Mid-Continent Airport, Sheet 16 of 17). The property lies beyond the boundaries of the area identified for acquisition by the Airport master plan. It is within the Airport Airspace Conical Surface map, which regulates structure height. The Wichita Airport Advisory Board briefly discussed the zone change at a meeting on March 6, 2006, with respect to future airport expansion plans and/or protection plans. The board indicated a preference against homes, schools and churches near airports and a desire for large industrial tracts ready for development, concluding by recommending the City of Wichita purchase the parcel and approval of industrial zoning.

The "2030 Wichita Functional Land Use Guide Map, as amended May 2005" of the *1999 Update to the Wichita-Sedgwick County Comprehensive Plan* visually portrays this area as appropriate for "urban residential" use and within the "Wichita 2030 urban growth area". In contrast, the property east of 103rd Street West (not included in the application area) is visually portrayed as "employment/industry center", which is defined as centers or concentrations of employment in industrial, manufacturing, service or non-institutional sectors. Land Use-Industrial **Strategy IV.A1** recommends protecting industrial areas "from encroachment or expansion of residential land uses by requiring appropriate buffers for expansion of the residential use when a nuisance situation is likely to be created." The requested site conforms to the industrial locational guidelines for close proximity to major arterials, belt highways, airports and connection to industrial land to the east of Maize and along K-42. The requested site conflicts with the industrial locational guideline of locating industrial uses away from planned residential areas (Harvest Ridge Addition) and sited to prevent traffic through less intensive land use areas by channeling traffic from the proposed site onto

Maize Road (103rd Street West) that then must travel south past Harvest Ridge to K-42 or north through developing residential areas to Kellogg.

Analysis: MAPC originally heard the case on May 26, 2005 and voted (10-0) to defer the case indefinitely. An owner of a large tract nearby spoke in opposition. Protests from many residents living along Maize Road north of the request were filed, protesting the proposed zone change to LI.

The MAPC reheard the case on July 20, 2006. Citizens spoke in opposition to the zone change. The applicant indicated agreement with the alternative conditions of IP zoning with a protective overlay and provided handouts showing the type of industrial use proposed for the site. MAPC recommendation (13-0) was to APPROVE IP INDUSTRIAL PARK SUBJECT TO PROTECTIVE OVERLAY #176 WITH THE FOLLOWING CONDITIONS:

1. A building setback of 100 feet shall be provided on the north, south and west property lines.
2. The following uses shall be prohibited: auditorium or stadium; animal care, limited and general; convenience store; restaurants with drive-through or in-car service and with more than 2,000 square feet gross floor area; tattooing and body piercing; wireless communication facility.

The condition of platting, which is a standard condition in zoning cases, was overlooked from the recommendation of MAPC. The Board of County Commissioners can add this condition.

Legally binding protests have been received from 5.68 percent of the property. Many other protests were received outside the legally binding protest area of 200 feet within the city of Wichita and 1,000 feet within the unincorporated area of Sedgwick County (shown on a second protest map covering a larger geographic area), as well as letters and emails expressing opposition.

Alternatives:

1. Approve the zone change to IP, subject to platting within one year and the provisions of Protective Overlay #176; adopt the findings of the Metropolitan Area Planning Commission; direct staff to prepare an appropriate resolution after the plat has been approved and authorize the Chairman to sign the resolution, or
2. Return such recommendation to the MAPC with a statement specifying the basis for the BOCC's failure to approve or disapprove.
3. Deny the zone change and override the MAPC recommendation with a 2/3 vote.

Financial Considerations: Not applicable.

Policy Considerations: The MAPC recommendations are based upon the findings of fact stated in the MAPC minutes.

Legal Considerations:   *Approved as to form and signed by County Counselor's Office*

Re: ZON2016-00039: City Administrative Adjustment to adjust building setbacks along west property line in PO-176.

Legal Description: Lot 1, Block A, Skyway West Addition, Wichita, Sedgwick County, Ks. The property is generally located at the southwest corner of Maize Road and 31st Street South

Dear Applicants:

We have reviewed your request for a Zoning Adjustment to eliminate the 100 foot building setback along the west line of the property.

Section V-C.14 of the Unified Zoning Code ("UZC") allows the Planning Director, with the concurrence of the Zoning Administrator, to approve minor adjustments to an approved PO. We find that modifying P.O. #176 to eliminate the 100 foot building setback along the west line of the property meets the conditions required by Sec. V.I.6 of the Code.

Our signatures below indicate that the modifications for P.O. #176 on the aforementioned property is hereby GRANTED, subject to the following conditions:

- 1) The site shall conform to all codes including but not limited to building, health and fire.
- 2) The adjustment applies only to the west property line building setback.
- 3) If the Zoning Administrator finds that there is a violation of any of the conditions of the Zoning Adjustment, the Zoning Administrator, in addition to enforcing the other

remedies set forth in the Unified Zoning Code, may, with the concurrence of the Planning Director, declare that the Zoning Adjustment is null and void.

The "Development Application" sign should now be removed from the property.
