Re: BZA2003-00028: Zoning Adjustment to reduce the parking requirement by 25 percent from 189 spaces to 141 spaces.

Legal Description: Lot 1, WSM Properties Addition, Wichita, Sedgwick County, Kansas together with Even Lots 22 through 52, inclusive, Block B, Isabella Addition, Wichita, Sedgwick County, Kansas. Located at the southwest corner of Harry and Sheridan (1601 S. Sheridan).

Dear Mr. Griffitt:

We have reviewed your request for a Zoning Adjustment to reduce the parking requirement on the above-referenced property. From reviewing your application, we understand that you propose to expand the existing 73,600 square-foot manufacturing building on the property to add 20,900 square of manufacturing space. We further understand that the parking requirement after the proposed improvements are completed has been determined to be 189 parking spaces; however, only 141 parking spaces are currently provided on the property. You indicate that there will be only 90 employees on site, and the 141 parking spaces currently provided are more than sufficient. Therefore, you have requested a Zoning Adjustment to reduce the parking requirement by 25 percent.

Sec. V-I.2.i. of the Unified Zoning Code allows an adjustment to reduce the parking requirement by up to 25 percent for expansion projects when the conditions required by Sec. V-I.6. of the Code are met. We find that the reduction of the parking requirement as proposed meets the four conditions required by Sec. V-I.6 of the Code as set out below:

- 1) Impact on safety and convenience of vehicular and pedestrian circulation: There will be only 90 employees on site, but 141 parking spaces are provided. Therefore, the occupancy of the building is lower than anticipated by the parking requirements. Such instances are the reason flexibility is provided within the Code to allow for minor reductions of the parking requirement. The extent of the parking requirement reduction is within allowable limits; therefore, sufficient on-site parking should be provided such that on-street parking for the building should not be necessary. Since all parking for the building should be off-street, there should not be negative impacts on the safety and convenience of vehicular and pedestrian circulation in the area.

T 316.268.4421 F 316.268.4390

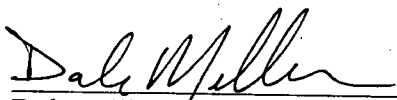

www.wichitagov.org

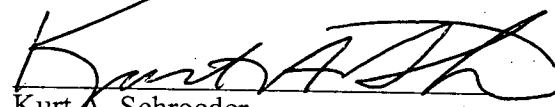

- 2) Impact on existing uses in surrounding areas: There should be no negative impact on uses in surrounding areas as a result of the reduction of the parking requirement, as sufficient parking should be provided on-site with no resulting off-site parking need being generated by the building that would utilize parking provided for adjacent businesses.
- 3) Compatibility with existing or permitted uses on abutting sites: Manufacturing and accessory uses such as parking are permitted in industrial zoning districts, and reducing the parking requirement should not compromise existing or permitted uses on abutting sites due to the minor nature of the reduction of the parking requirement.
- 4) Effect on public health, safety or welfare: There will be no encroachment into public utility easements or right-of-way; therefore, there should not be a negative impact on the public health, safety or welfare nor will properties or improvements in the vicinity be materially injured.

Our signatures below indicate that a Zoning Adjustment to reduce the parking requirement by 25 percent from 189 spaces to 141 spaces for the aforementioned property is hereby granted, subject to the following conditions:

- 1) The site shall be developed in general conformance with the approved site plan.
- 2) The parking area shall be paved and marked in general conformance with the approved site plan.
- 3) The Zoning Adjustment is for a parking requirement reduction only for a manufacturing building with a maximum of 94,500 square feet. If an increase in building square footage and/or a change in use increases the parking requirement of the Unified Zoning Code for the property, then additional parking spaces over and above 141 shall be provided
- 4) If the Zoning Administrator finds that there is a violation of any of the conditions of the Zoning Adjustment, the Zoning Administrator, in addition to enforcing the other remedies set forth in Article VIII of the Unified Zoning Code, may, with the concurrence of the Planning Director, declare that the Zoning Adjustment is null and void.

The zoning adjustment sign may now be removed from the property.
