COMMENTS:

1. The following items should be considered by the Planning Commission in making findings of fact:

The applicant is requesting a change of zoning from "AA" Single-family and "LC" Light Commercial to "C" Commercial for a tract of land containing approximately one-half acre located at the southeast corner of Porter and 29th Street North.

In viewing the area in the field, it was noted that racks of irrigation pipes were stored outside and that trenchers, used in the applicants business, were also being stored on the premises in violation of the zoning ordinance. The applicant advises that he desires to expand his business by having some plant materials displayed on the site. Two portable office buildings are on the site both without having a permit from the office of Central Inspection.

Subject property is a portion of a platted lot on which an application for a "lot split" was submitted by this same applicant on March 1, 1982, and approved subject to certain conditions which were never complied with (L/S-0542) and is still an open file.

The adopted zoning policy on 29th Street North as it pertains to subject property proposes the following:

"The 'R-5' and 'R-6' General Residence Districts for both sides of 29th Street from the 'LC' zoning just east of Hood to Coolidge."

The requested "C" zoning district permits uses such as machine shops, warehousing and contractors storage yards. These types of uses should be discouraged from developing adjacent to low density residential areas.

2. Should the Planning Commission recommend approval of this application, it should be approved subject to replatting within 6 months from the date of zone change approval by the City Commission; or the case be considered denied and closed; and that the ordinance establishing the zone change not be published until the plat has been recorded with the Register of Deeds; and subject to the applicant obtaining the appropriate permits for the two portable office buildings from the Office of Central Inspection.
