Re: CON2001-00014 – Administrative Permit for a temporary 85-foot high wireless communication facility on property zoned “LC” Limited Commercial. Generally located south of Central and east of Tyler (610 N. Tyler) on Lot 2, Hatstrup Addition.

Dear Mr. Khoury:

We have reviewed your request for an Administrative Permit for a temporary 85-foot high wireless communication facility on property zoned “LC” Limited Commercial. Your application indicates that a temporary “cellular on wheels” (C.O.W.) is needed for Cricket Communications to provide wireless phone coverage in the area until a permanent wireless communication facility is approved and constructed. You estimate it will take up to seven months before a permanent wireless communication facility can be operational.

Section III-D.6.g.(3)(c) of the Wichita-Sedgwick County Unified Zoning Code states that new ground-mounted wireless communication facilities up to 85 feet in height in the “LC” Limited Commercial zoning district shall be approved by Administrative Permit if they conform to the Location/Design Guidelines of the Wireless Communication Master Plan and the Compatibility Height Standards of Section IV-C.5 of the Unified Zoning Code.

In reviewing your request’s conformance to the Location/Design Guidelines of the Wireless Communication Master Plan, we find that the Location/Design Guidelines provide policy guidance regarding the placement of permanent wireless communication facilities and do not specifically address the placement of temporary facilities such as a C.O.W. We find that the impact of the temporary facility on surrounding properties will be limited due to the short time period for which the 85-foot high C.O.W. will be located on your property; therefore, we find that the request conforms to the Location/Design Guidelines of the Wireless Communication Master Plan

The Compatibility Height Standards require the proposed 85-foot high C.O.W. to be located no closer than 85 feet from the lot line of property zoned “TF-3” Two-Family Residential or more restrictive. The proposed 85-foot high C.O.W., as shown on the site plan submitted with this application, is located

approximately 500 feet from property to the southwest zoned "SF-6"; therefore, we find that the request conforms to the Compatibility Height Standards.

Our signatures below indicate that an Administrative Permit for a temporary 85-foot high wireless communication facility on the aforementioned property is hereby GRANTED, subject to the following conditions:

1. The temporary wireless communication facility approved for placement on the site is an 85-foot high cellular on wheels, which shall be removed from the site no later than September 28, 2001.
2. The site and the temporary wireless communication facility shall be developed in general conformance with the approved site plans and elevation drawings. All improvements shall be completed before the facility becomes operational.
3. The site and the temporary wireless communication facility shall be developed and operated in compliance with all federal, state, and local rules and regulations.
4. Any violation of the conditions of approval shall render this Administrative Permit null and void.

The zoning adjustment sign may now be removed from the property.
