TYPICAL SECTION

COMBINED CURB & GUTTER

GENERAL NOTES

The contractor shall verify all underground utility line locations in the field prior to construction. Contact Dig Safe, 344-7233, and Southwestern Bell Telephone Company at 1-571-2116.

The contractor shall fill and regrade the disturbed right-of-way areas back to the appropriate grades and leave the areas in good condition. All curbs and gutters, if any, shall be considered as incidental to the bid item "S.V. Pavement Removal".

No subgrade treatment will be required for construction of this project. The 6" subgrade material shall be compacted to 95% of standard density or greater.

The 22' concrete drive approach shall be centered at the Lot line from.
