## REINF. CONC. OUTFALL STRUCTURE
STA. 0+50 LINE No. 1
Scale: 3/8" = 1'-0"

Concrete for structures shall contain not less than 1.65 bbls. of cement per cu. yd. of concrete. In no event shall the total water content exceed 6.25 gals. per sack of cement. The mixture of fine and coarse aggregate shall be such to produce a maximum density of a most workable mixture. An internal vibrator shall be used for placing concrete. The floor of manholes are to be shaped for flow and drainage.

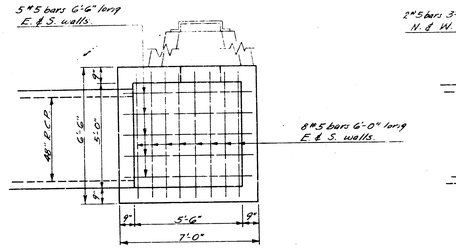

Catch basin leads are to enter the brick stacks on top of the reinf. conc. manholes at the elevations shown on the plan.

The cost of the brick stack is to be included in the bid price of reinf. conc. manhole.
