The diagram shows a cross-section of a mastic joint. It consists of two concrete slabs separated by a joint. The joint is filled with mastic. Reinforcement bars are shown in the concrete slabs. Dimensions are indicated: 18" for the width of the joint, 12" for the width of the concrete slabs, and 18" for the width of the joint. The reinforcement bars are labeled as 1/2" diameter, 3' long, and 2'-6" centers.

Use 1/2" ϕ bars, 3' long, 2'-6" centers
