

SIDEWALK IMPROVEMENTS

TO

29TH STREET NORTH

FROM AMIDON AVE. TO ARKANSAS AVE.

SIGNALIZED MID-BLOCK PEDESTRIAN CROSSING

ON 29TH ST. BETWEEN HOOD AND SALINA

PROJECT NUMBER

472-76-245-81905-000-000-001

INDEX CODE 602133

CITY OF WICHITA, KANSAS

MICHAEL E. LINDEBAK
CITY ENGINEER

BENCHMARKS

1. City Hic 44.5' S. and 40.8' W. of centerlines 29th St. N. and Amidon; elevation 127.22.
2. Chiseled square cut in top of curb W. side Coplidge on N. side 25th, sta 6+45; elev. 127.85.
3. R.R. spike in P.P. (s. side) sta. 13+22, 25.8' lt. of section line; elev. 127.44.
4. City Hic 44' N. and 32' E. of centerlines 29th St. N. and Hood; elevation 128.91.
5. R.R. spike in P.P. (n. side) sta. 34+70.1, 10.4' lt. of section line; elevation 127.55.
6. R.R. spike in P.P. (n. side) sta. 41+05, 25.5' rt. of section line; elevation 127.55.
7. R.R. spike in H.L.P. (n. side) sta 46+05.5, 15.1' lt. of section line; elevation 128.24.

GENERAL NOTES

1. Interurban traffic generated outside the project area and local business or apartment traffic generated within the project area are to be carried through construction as further promulgated by project special provisions.
2. Utility service lines, poles, valve boxes, meters, and etcetera are to be adjusted as necessary by others prior to construction unless the plans specifically call for their adjustment by the Contractor or unless the plans specifically identify a utility to be adjusted by its owner during construction. Existing utilities and their location, as shown on the plans, represent the best information obtainable for design. The contractor will be required to work around existing utilities within the right-of-way which do not conflict with proposed construction.
3. Rubble from the removal of miscellaneous structures and excess excavation which is to be wasted shall be disposed of on sites to be provided by the Contractor. These sites shall be approved by the Engineer as to suitability, appearance and site location. Locations that, in the opinion of the Engineer, will leave an unsightly appearance will not be approved.
4. Properties within the project limits may have underground sprinkler systems in public right-of-way which conflict with new construction. Contractor will be required to remove such improvements should they not be removed by their owner at the time of construction of the project. The Contractor will be required to salvage all sprinkler heads and/or valves and give such material to their owner. Portions of underground sprinkler systems not in conflict with new construction shall be protected from damage and shall remain in place. All work in connection with underground sprinkler systems shall be considered as subsidiary to the contract pay items of work.
5. Mailboxes within the limits of the project shall be removed and replaced by the Contractor as approved by the Engineer. Contractor will be required to make satisfactory provisions for mail delivery to properties affected by this project during its construction.
6. Trees and shrubs in public right-of-way which are in direct conflict with proposed new construction shall be removed by the Contractor with the Engineer's approval. Trees and shrubs which are not in direct conflict with proposed new construction shall be saved and protected from damage.
7. The Contractor shall be responsible for preserving property irons. The Contractor will be required to re-establish any property irons which are damaged or destroyed by his construction operations. Such irons shall be re-established by a licensed land surveyor in accordance with state laws.
8. Removal of existing concrete parking lot pavements, asphalt parking lot pavements, asphalt driveway pavements and/or asphalt sidewalk pavements will be paid for as square feet of walk and drive removed.
9. Construction of asphalt parking lot pavement shall be paid for at the unit price bid per square yard of 6" asphalt parking lot construction (4" bituminous base).
10. Construction of concrete parking lot pavement will be paid as square feet of drive for the thickness indicated.
11. The Contractor shall give all property owners and/or tenants of developed property abutting the project limits a minimum of ten (10) days advance notice prior to start of construction. All sidewalk to be constructed with this project shall be 4" thick, except where noted otherwise on the plans.
12. All grassed areas disturbed by construction operations shall be fertilized and seeded, using Rebel fescue seed. Slope slopes which are seeded shall be mulched. All such work shall be per standard City of Wichita specifications.
13. Offset distances left and right indicated on the plans are from section line (centerline 29th Street North).
