

The drawing is a technical site plan for a road improvement project. It depicts a horizontal section of a road with a total width of 300 feet between the outer edges. Stationing is marked along the top edge, starting at 140+ and ending at 190+. Elevation data is provided throughout the plan, indicating both existing ground levels and proposed pavement heights. A central vertical line marks the centerline of the road. To the left of the road, there are several cross-sectional views showing the profile of the terrain and the planned road grade. These sections are labeled with values such as 14.0, 16.2, 15.4, 20.0, 29.2, 26.2, 20.7, 21.6, 32.0, 20.1, 14.2, and 26.3. A note near the centerline reads "Distance of Peak 1/2 of 80 ft". Another note indicates "Proposed". A slope of "7-12" is shown on one side. The road is bordered by "WOODLAND AVE" on the left and "JEANNETTE AVE" on the right. The overall orientation is indicated by a north arrow pointing towards the top of the page.
