PROJECT Silverleaf

PROJECT NO. _____ DATE 4-23-84

TO Mr. Mike Lindebak, P.E.
City Engineer
455 North Main - 7th Floor
Wichita, Kansas 67202

The proposed development will be done in phases. Phase I will be the area designated as IV and V on the drainage plan.

Sanitary sewer lateral excension has been made across the No. 1 fairway. Off-site easements will be granted along with the petitioning of sewer service to Phase I and under the private drive to eventually serve lot 1, Block 1 of Silverleaf. Additional easements will have to be granted by seperate instrument in the fucure as the configuration of the units and drives are fixed.

Storm drains are sized and generally located on the drainage plan. Off-site easements for underground conduct and open channel work directed to "Windemere Lake" shall be granted. This work will be petitioned for, even though it is not listed as an item to be guaranteed with the Sub-division Report.

We also will be meeting with KG&E regarding underground utilities crossing their easement in addition to the proposed private drive.

A detailed grading plan will be a part of the construction documents submitted to C.I.D. Mid-Kansas Engineering will submit a copy of this plan as soon as possible to Mr. Breitenstein.

Kenneth H. Bengtson
