City of Wichita Water Dept
Proj No. 587-80-925-80275-000-000-001

City of Wichita Sanitary Sewer
Proj No. DBKL 70703G

SCALE: 1"=50'

NOTE: Construction of on-site waterlines shall be started at the south right-of-way line of Sedell if the 6" Waterline paralleling Sedell is unconstructed. In this event, construction of the connecting segments across Sedell will be executed under private contract after completion of the Sedell main.

6" Waterline To Be
Const. by Others

UTILITY PLAN

PIPE STAKING DETAIL

UTILITY PROFILES

See Site Grading and Utility Plans, 20' Nos. 4, 5 for additional information.

All casing pipe shall be new steel pipe meeting A.S.T.M. Specification A 136 Grade B and shall have a minimum wall thickness of 0.25 inch. Good used steel pipe meeting the above requirements may be used when approved by the Chief Water Pipeline Construction Inspector.

Treated wooden blocks or skids shall be fastened to each joint of casing pipe in such a manner as to properly support the casing pipe concentric within the casing pipe. After the casing pipe has been installed the casing pipe shall be completely filled with sand and the ends permanently closed.

The installation of casing pipe by boring shall use methods and equipment that encase the hole as the earth is removed. Boring without the concurrent installation of a casing pipe will not be permitted.

INSTALLATION OF 18-INCH CASING PIPE
