NOTES:

1. The wall design shall be performed by the Manufacture and shall be stamped by a Professional Engineer. The Wall shop drawings shall be submitted to the Engineer and approval obtained prior to construction. The wall shall be installed per Manufacturer's recommendation and shop drawings. Geotechnical information will be obtained by contractor. Differential settlement of walls shall not have a slope of more than 0.005%
2. Sections and details of retaining wall are shown for reference only.
3. Geogrid to be installed per Manufacturer's recommendation.
4. Angles shown are actual slope of wall, not the projected angle.
5. Pier auger to penetrate soundly into Wellington shale (thru the weathered surface).
