

FHWA REGION NO.	STATE	PROJECT NO.	YEAR	SHEET NO.	TOTAL SHEETS
7	KANSAS	54-87 K-4445-01	1996	51	73

Front and back of Identification Sign to be painted white. 1/2" Block lettering as shown in sketch to be applied on the white background in black color on both sides of the sign. This sign is to be tied to the fence with twisted wire at each corner of the sign as shown and shall be placed at 300' to 500' intervals along the line of fence.

GENERAL NOTE
A line post shall be used at each cross fence, and the contractor shall make a temporary connection. This work shall be subsidiary to other bid items.
In general, where needed, use small channel crossing as shown, Type I and Type II Floodgates will be used very seldom.
