

**FOX RIDGE ADDITION - PHASE 1
CROSS SECTIONS
BRUSH CREEK**

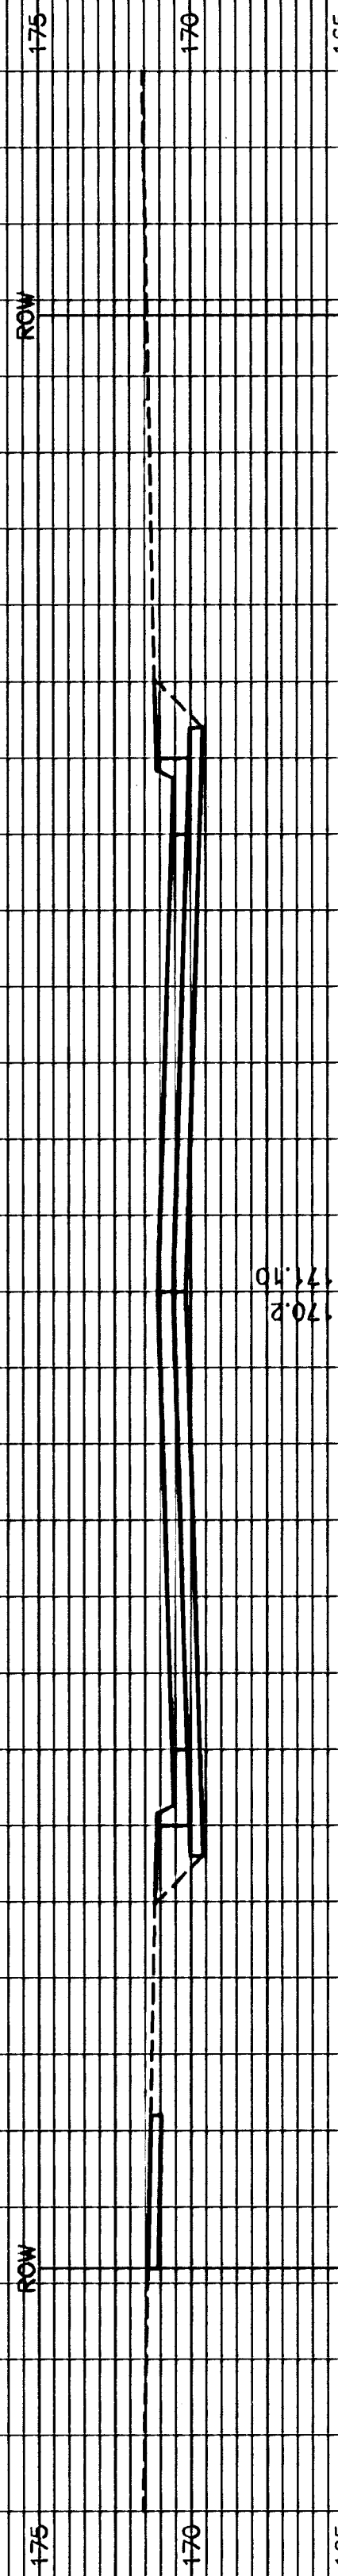

[illegible]

Figure 1 consists of two line graphs. The top graph is labeled 'ROW' and the bottom graph is labeled 'COL'. Both graphs have 'Nodes' on the y-axis (ranging from 0 to 100) and 'Iteration' on the x-axis (ranging from 0 to 1000). The 'ROW' graph shows a sharp increase in nodes around iteration 200, reaching a plateau near 100. The 'COL' graph shows a similar trend but with more fluctuations, reaching a plateau around 80.
