

GENERAL NOTES

- Conduit shall be jacked or bored if not installed before placing of new pavement.
- Placement of Service/Junction Boxes, Conduit Runs and Controller are typical and may be adjusted as directed by the Engineer to facilitate installation.
- The Contractor shall contact utility companies which may be affected by the installation of Traffic Signalization prior to any construction.
- Non-metered 120 volt power to be obtained from a proposed 120 volt Westar transformer at approximately 13th St. Sta. 19+95. 85' left. Contractor shall provide and install a 2" PVC conduit from the existing Westar 480 volt transformer located at Sta. 20+00, 85' left, to the proposed 120 volt transformer, from the 120 volt transformer to the proposed service box at Sta. 20+03, 55' left and to the proposed service box on the south side of 13th St. located at Sta. 20+21, 30' right. Contractor to provide a 1" PVC conduit from the proposed service box located at Sta. 20+21, 30' right, to the existing pole located at Sta. 20+65, 48' right. Westar will provide and install the 120-volt transformer, and install the conductor from the 480-volt transformer to the 120-volt transformer. Contractor shall provide and install non-metered conductor from the 120 volt transformer to the meter, and shall provide metered conductor from the meter to the traffic signal controller.
- Contractor shall install a 1" rigid galvanized conduit from the pole located at Sta. 20+65, 48' right, to the traffic signal controller located at Sta. 20+21, 47' right, to carry the metered conductor from the meter to the traffic signal controller. Meter address is 9919 E. 13th St
- Controller shall also provide and install an empty 2" PVC conduit from the 120 volt transformer to the joint use traffic signal pole located at Sta. 20+00, 55' left, for use for future street lighting conductor.
- PVC conduits carrying non-metered power shall be installed with steel elbows.
- Exact Video Detection Camera locations to be at the direction of the Manufacturer's Representative. Video Camera cable terminations, camera fine tuning, system set-up, and programming will be performed by the supplier with the assistance of the contractor.
- See Signal Pole Details for additional Traffic Signal Structures requirement.
