Re: BZA2018-00010: County Administrative Permit to allow a wireless communication facility with 100-foot tall monopole on property zoned RR Rural Residential (RR), generally located on the north of 13th Street North and west of 279th Street West at 28700 West 13th Street North.

Legal Description: Lot 1, Block 1, Ninnescah Subdivision, being a part of Section 8, Township 27 South, Range 3 West of the 6th P.M., Sedgwick County, Kansas.

Ms. Stutler:

We have reviewed your request for an Administrative Permit for a wireless communication facility with a 100-foot tall self-support galvanized steel, monopole for Westar generally located on the north of 13th Street North and west of 279th Street West at 28700 West 13th Street North.

Sec.VI.A.2.d., of the Wireless Communication Master Plan states that new ground-mounted wireless communication facilities up to 120 feet in height in the RR zoning district may be approved by Administrative Permit if they conform to: the Compatibility Height Standards of Section IV-C.5.b. of the Wichita-Sedgwick County Unified Zoning Code (UZY), and the Location/Design Guidelines of the Wireless Communication Master Plan.

You propose a 100-foot tall tower on the RR zoned subject site, which is below the maximum height for the RR zoning district. The Compatibility Height Standards requires the proposed 100-foot tall tower be located no closer than 245 feet from the lot line of property zoned TF-3 Two-Family Residential (TF-3) or more restrictive. The proposed tower location is 351 feet from the RR zoned property to the west and 452 feet from the RR zoned property to the southeast; therefore, we find that the request conforms to the Compatibility Height Standards.

In reviewing the request's conformance to the Location/Design Guidelines of the Wireless Communication Master Plan, we find the following:

1. The proposed site for the wireless communication facility to be a 100-foot tall self-support galvanized steel, monopole cell phone tower on RR Rural Residential ("RR") zoned described portion of Lot 1, Block 1, Ninnescah Addition, does not exceed the maximum height of 120 feet for the RR zoning district.
2. The proposed 100-foot tall tower conforms to the Compatibility Height Standards.
3. The proposed location is within the electric substation compound constructed on the site and that site is already developed with many structures and other improvements which will minimize the likelihood the wireless communication facility (tower) will be the dominant visual amenity; thereby mitigating any issues for the neighborhood.

Based on the compliance the Compatibility Height Standards of the Unified Zoning Code and compliance with the Location/Design Guidelines of the Wireless Communication Master Plan, our signatures below indicate that an Administrative Permit for a wireless communication facility is hereby GRANTED for the above-referenced property, subject to the following conditions:

1. All requirements of Section III.D.6.g. of the Unified Zoning Code shall be met.
2. The applicant shall obtain all local, state and federal permits necessary to construct the wireless communication facility, including approval by the FAA for the height of the tower and radio frequency; FAA approval shall be provided to the Metropolitan Area Building and Construction Department at the time of applying for building permits. The wireless communication facility shall be built within one year of approval of the Administrative Permit or it will be declared null and void.
3. The site for the wireless communication facility and its 100-foot tall self-support galvanized steel, monopole tower shall be developed in general conformance with the approved site plan and elevation drawing. The site shall be located on the RR zoned Lot 1, Block 1, Ninnescah Addition, as described in the attached legal description and the approved site plan. All improvements shall be completed before the facility becomes operational.
4. The support structure shall be a monopole design and shall be silver or gray or a similar unobtrusive color with a matte finish to minimize glare.
5. The site shall be developed and operated in compliance with all federal, state, and local rules and regulations.
6. If the Zoning Administrator finds that there is a violation of any of the conditions of the Administrative Permit, the Zoning Administrator, in addition to enforcing the other remedies set forth in the Unified Zoning Code, may, with the concurrence of the Planning Director, declare that the Administrative Permit is null and void.

The "Development Application" sign should now be removed from the property.

Dale Miller, Planning Director
Metropolitan Area Planning Department

Scott Knebel, Zoning Administrator
