RE: BZA2013-00030: Administrative Adjustments to clarify that the development standards contained in Protective Overlay #51 (PO-51) associated with zoning case Z-3316 that assigned GO General Office (GO), 2, 3, 4, part of 5, 6 and 8 do not apply to single-family or two-family residential development on the 8.73 acres covered by PO-51 located southwest of the intersection of Jackson Heights Street and East Central Avenue.

Legal Description: Frontgate Addition to Wichita, Sedgwick County, Kansas.

Dear Applicants:

The Wichita-Sedgwick County Unified Zoning Code (UZO) (Article V, Section V-I.1) grants the Planning Director, with the concurrence of the Director of the Metropolitan Area Building and Construction Department, the authority to approve applications for Zoning Adjustments.

The applicant is seeking clarification that the development standards 2, 3, 4, 5, 6, and 8 of Protective Overlay #51 do not apply to single-family or two-family residential development on property platted as the Frontgate Addition. When PO-51 was created the property owner's intention was to construct a nonresidential development on the site; therefore, the PO contained development standards dealing with (the number in the parentheses is the PO number): (2) maximum gross floor area; (3) signage; (4) architectural control; (5) building height/number of building stories; (6) increased setback from the centerline of Central and (8) increased landscaping. Development standards (1) limit the site to single-family, duplex, day care, automated teller machine, medical service and general office uses; and (7) limits access to one opening on Central and two to Jackson.

The current property owner intends to develop single-family or two-family residences on the site and requests clarification which of PO-51's development standards apply to single-family or two-family residential.

It is our interpretation that only development standards: (1) dealing with permitted uses; (5) only the 35-foot building height limit applies, not the number of stories; and (7) access controls apply to single-family and two-family residential development within Frontgate Addition.

Adjustments to Protective Overlays are permitted by Article V, Section V-D.14 subject to three limitations: no more than a five-foot or ten percent increase in building height is allowed; no more than a ten percent increase in floor area or building coverage or in residential density is allowed or a change in use to a use that is more intensive. The requested clarification does not violate any of the listed limitations. The PO does not include a limitation on the number of dwelling units, only the maximum gross floor area that is applied to non-residential development.

Our signatures below indicate that the requested Zoning Adjustment is hereby GRANTED, subject to the following conditions:

- 1) Development standards 2, 3, 4, 6 and 8 contained in PO-51 do not apply to single-family or two-family residential development. The limitation on the number of stories contained in standard (5) is also waived; however, the 35-foot building height limit remains. The site development standards of zoning districts SF-5 or TF-3 apply to single-family or two-family residential development respectively.
- 2) If the Zoning Administrator finds that there is a violation of any of the conditions of the Zoning Adjustment, the Zoning Administrator, in addition to enforcing the other remedies set forth in the Unified Zoning Code, may, with the concurrence of the Planning Director, declare that the Zoning Adjustment is null and void.

The "Development Application" sign should now be removed from the property.
