Re: S/D 95-4 PINEHURST (STONEBRIDGE) ADDITION (Preliminary Plat)

Gentlemen:

At the regular meeting of the Metropolitan Area Planning Commission on March 9, 1995, the above captioned plat was considered. The action of the Planning Commission was to recommend that the plat be approved as recommended by the Subdivision Committee subject to the conditions stated in our letter of March 2, 1995.

In addition to complying with those conditions, it is necessary that you meet the following requirements before this plat can be forwarded to the City Council for consideration:

1. Submission of the fully completed and signed tracing of the subdivision to the Metropolitan Area Planning Department.
2. Submission of a check, made out to the Register of Deeds, covering the costs of any documents to be recorded as a requirement of platting.
3. Subdivision regulations now require a detailed Lot Grading Plan be submitted to Engineering prior to the tracing being released. This applies to all multi-lot and residential developments.

Please call if you have any questions.

Sincerely,

Don Losew
Senior Planner

Re: PINEHURST (STONEBRIDGE) ADDITION (Preliminary Plat)

Gentlemen:

At the regular meeting of the Subdivision Committee of the Metropolitan Area Planning Commission on Thursday, March 2, 1995, the above captioned plat was considered. The action of the Committee was to recommend that this plat be approved subject to:

A. *City* The applicant shall guarantee the extension of City water to serve the lots being platted. Since this property will utilize a City of Wichita water supply line in 143rd Street East, the applicant shall submit an outside-the-City water service application and associated restrictive covenant. *- Gary W. was agreed - will take it to the City.*

County B. The applicant shall guarantee the extension of sanitary sewer to serve the lots being platted. This guarantee will be with the County.

County C. The applicant shall guarantee any drainage improvements required by the platting of this property. These improvements may be included with the paving guarantees.

County D. The applicant shall guarantee the paving of the proposed private interior streets to the public street standard. The applicant is reminded that a petition cannot be used as a guarantee for a private street.

Provided that the applicant removed the conditional use (CU-379) for 2-family development, a 29-foot paved private street can be allowed. The applicant has submitted a letter to the Planning Department (Zoning section) requesting that the conditional use be removed. It is understood that CU-379 was approved subject to platting and while this plat would complete the conditions to allow the conditional use to go into effect, it should be appropriate to withdraw the conditional use at this time, noting that completion of this plat will not now result in adoption of the Conditional Use.

E. If improvements are guaranteed by petition, a notarized certificate listing the petitions shall be submitted to the Planning Department for recording. Both a City and County Petition, as appropriate, shall be submitted.

- F. Provisions shall be made for ownership and maintenance of the proposed reserves. The applicant shall either form a lot owners' association prior to recording the plat or shall submit a covenant stating when the association will be formed, when the reserves will be deeded to the association and who is to own and maintain the reserves prior to the association taking over those responsibilities. This covenant shall also provide for the homeowners' association to maintain the "parking strip" area located between the perimeter of this plat and the driving surfaces for Central and 143rd Street East. This covenant shall also require the Homeowners' Association to install no parking signs on one side of the private street if requested to do so by the County for safety purposes.
- G. For those reserves being platted for drainage purposes, the required covenant which provides for ownership and maintenance of the reserves shall grant, to the County, the authority to maintain the drainage reserves in the event the owner(s) fail to do so. The covenant shall provide for the cost of such maintenance to be charged back to the owner(s) by a method similar to special assessments.
- H. The applicant shall submit a covenant which provides for four (4) off-street parking spaces per dwelling unit on each lot which abuts a 29-foot private street. The covenant shall inventory the affected lots by lot and block number and shall state that the covenant runs with the land and is binding on future owners and assigns.
- I. Since this plat proposes the platting of narrow street rights-of-way with adjacent "15-foot public drainage, utility and private street easement," a restrictive covenant shall be submitted which calls out restrictions for lot-owner use of these easements. Retaining walls and change of grade shall be prohibited within these easements as well as fences, earth berms and mass plantings.
- J. The applicant shall be responsible for all needed improvements in respect to the emergency access easement (paving, gates, etc.). The plat's text shall also note this easement, specifically indicating that the easement is to be unobstructed (except for an approved gate).
- K. The applicant's engineer is advised that the Register of Deeds is requiring the name(s) of the notary public, who acknowledges the signatures on this plat, to be printed beneath the notary's signature.
- L. To receive mail delivery without delay, and to avoid unnecessary expense, the applicant is advised of the necessity to meet with the U.S. Postal Service Growth Management Coordinator (phone 316-946-4527) prior to development of the plat so that the type of delivery, and the tentative mailbox locations can be determined.
- M. The applicant shall install or guarantee the installation of all utilities and facilities which are applicable and described in Article 8 of the MAPC Subdivision Regulations. (Water service and fire hydrants required by Article 8 for fire protection shall be as per the direction and approval of the Chief of the Fire Department.)

- N. The applicant is advised that various State and Federal requirements [specifically but not limited to the Army Corps of Engineers, David Hibbs, Kanopolis Project Office, Rt. 1, Box 30, Marquette, KS 67464 (913-546-2294) or Ron Little, Kansas Department of Fish and Wildlife, P. O. Box 317, Valley Center, KS 67147] for the control of soil and wind erosion and the protection of wetlands may impact how this site can be developed. It is the applicant's responsibility to contact all appropriate agencies to determine any such requirements.
- O. Perimeter closure computations shall be submitted with the final plat tracing Section 5-101(c).
- P. Recording of the plat within 30 days after approval by the City Council.
- Q. The final plat tracing shall indicate a 10-foot utility easement along Lots 12 & 13, Block 1's common lot line.
- R. On the final plat tracing, the minimum building pad elevation shall be shown as 1319, i.e., without the .0.

If this plat requires the guaranteeing of improvements a list of the five methods which have been adopted as being acceptable is available through the Planning Department. Also, certificates which are required if petitions are submitted and forms for the bond and irrevocable Letter of Credit are also available from this office.

The enclosed "marked" copy of the final plat is for your information and files.

This matter will be forwarded to the Planning Commission for its consideration on Thursday, March 9, 1995 at 1:30 p.m. If you have any questions concerning this matter, please call.

Sincerely,

Don Losew
Senior Planner
