Re: S/D 95-13 U.N.B. ADDITION (Final Plat)

Gentlemen:

At the regular meeting of the Metropolitan Area Planning Commission on March 23, 1995, the above captioned plat was considered. The action of the Planning Commission was to recommend that the plat be approved as recommended by the Subdivision Committee subject to the conditions stated in our letter of March 16, 1995.

In addition to complying with those conditions, it is necessary that you meet the following requirements before this plat can be forwarded to the City Council for consideration:

1. Submission of the fully completed and signed tracing of the subdivision to the Metropolitan Area Planning Department.
2. Submission of a check, made out to the Register of Deeds, covering the costs of any documents to be recorded as a requirement of platting.
3. Subdivision regulations now require a detailed Lot Grading Plan be submitted to Engineering prior to the tracing being released. This applies to all multi-lot and residential developments.

Please call if you have any questions.

Sincerely,

Don Losew
Senior Planner

- K. The applicant shall submit letters from KG&E-Gas, KG&E-Electric, and S.W. Bell indicating that satisfactory arrangements have been made for the abandonment and/or relocation of facilities impacted by this plat.
- L. Perimeter closure computations shall be submitted with the final plat tracing Section 5-101(c).
- M. Recording of the plat within 30 days after approval by the City Council.

STAFF COMMENTS:

- A. The applicant shall guarantee the closure of all drives located in areas of complete access control or exceeding the number of allowed openings. In particular, all drives to Stadium shall be closed as should one drive to Grove. Also, any drives in excess of the number indicated to Central shall be closed. The 1992 aerial photo for instance indicates that Lot 2 has two (2) openings to Central, while only one is being provided for on the plat.
- B. The applicant shall guarantee any drainage improvements required by the platting of this property.
- C. If improvements are guaranteed by petition, a notarized certificate listing the petitions shall be submitted to the Planning Department for recording.
- D. As discussed with the Planning Department, the final plat tracing shall dedicate complete access control to Stadium Drive. Both the face of the plat and the plat's text shall note such dedication. Also, complete access control to Madison shall be dedicated from the plat's south 100 feet.
- E. Prior to this plat being released for recording, a platting binder shall be submitted and this plat will be subject to any relevant conditions determined by such a review.
- F. The applicant is advised that if Madison is vacated, it will involve a separate vacation case. That is, any future plat along the west side of Madison would not itself be able to vacate this street as part of the platting process. If vacated, any building setback, access control, etc. such as is shown on this plat, should also be included in the vacation.
- G. The final plat shall indicate the platting of the 20-foot building setback from Madison through the existing building which encroaches into the setback area. Central Inspection has advised that the platting of this building setback does not preclude the property owner from maintaining or remodeling that portion of the building within the setback area. The building cannot, however, be enlarged within the setback and, if the building is removed, any new building construction must observe the platted building setback.
- H. Since this plat will be vacating and replatting various easements, setbacks, access, etc. the surveyor's text shall make proper reference to KSA 512(b) as amended.
- I. The applicant shall install or guarantee the installation of all utilities and facilities which are applicable and described in Article 8 of the MAPC Subdivision Regulations. (Water service and fire hydrants required by Article 8 for fire protection shall be as per the direction and approval of the Chief of the Fire Department.)
- J. The applicant's engineer is advised that the Register of Deeds is requiring the name(s) of the notary public, who acknowledges the signatures on this plat, to be printed beneath the notary's signature.
