

- A. Because of the lack of public access to Lot 2 and also the lack of access to public sanitary sewer, the applicant shall covenant Lot 2 with the lots to the north in such a manner that cross-lot access will be assured and so that Lot 2 of this plat cannot be sold separately from these other lots unless or until public sanitary sewer is extended to this lot. The applicant may also wish to establish a separate access agreement for the benefit of Lot 2, in addition to the covenant.
- B. The applicant shall meet with City and Traffic Engineering to determine appropriate temporary turnarounds for Vermont and St. Louis. As determined necessary, the applicant shall submit a guarantee for such turnarounds. Also, the applicant shall submit a petition for the future installation of permanent turnarounds. This petition will be held until these streets are paved.
- C. If improvements are guaranteed by petition, a notarized certificate listing the petitions shall be submitted to the Planning Department for recording.
- D. The applicant shall submit an avigational easement covering all of subject plat and a restrictive covenant assuring that adequate construction methods will be used to minimize the effects of noise pollution in the habitable structures constructed on subject property.
- E. As requested by City Engineering, the final plat tracing shall indicate a drainage easement along the east 5 feet of Lot 2 and across the southern tip of Lot 2. The plattor's text shall also note the granting of such an easement.
- F. The applicant shall install or guarantee the installation of all utilities and facilities which are applicable and described in Article 8 of the MAPC Subdivision Regulations.
- G. The applicant's engineer is advised that the Register of Deeds is requiring the name(s) of the notary public, who acknowledges the signatures on this plat, to be printed beneath the notary's signature.
- H. Perimeter closure computations shall be submitted with the final plat tracing. Section 5-101(c).
- I. Recording of the plat within 30 days after approval by the City Council.
- J. The applicant is advised that the required platting binder has not yet been submitted for this site and that the forwarding of the plat to the City Council will be subject to a review of this binder and the satisfaction of any appropriate requirements noted by such review.

Re: S/D 93-3 J. ROGERS ADDITION (Final Plat)

Gentlemen:

At the regular meeting of the Metropolitan Area Planning Commission on March 25, 1993, the above captioned plat was considered. The action of the Planning Commission was to recommend that the plat be approved as recommended by the Subdivision Committee subject to the conditions stated in our letter of March 19, 1993.

In addition to complying with those conditions, it is necessary that you meet the following requirements before this plat can be forwarded to the City Council for consideration:

1. Submission of the fully completed and signed tracing of the subdivision to the Metropolitan Area Planning Department.
2. Submission of a check, made out to the Register of Deeds, covering the costs of any documents to be recorded as a requirement of platting.
3. Subdivision regulations now require a detailed Lot Grading Plan be submitted to Engineering prior to the tracing being released. This applies to all multi-lot and residential developers.

Please call if you have any questions.

Sincerely,

DL / BLP
Don Losew
Senior Planner
