Note to Contractor

Inspection and Testing for this project is to be provided by a licensed consulting engineering firm under contract with the owner/developer. Said inspection is to be in accordance with the City of Wichita standard construction engineering practices and certified by a licensed professional engineer. No work shall be performed in dedicated easements or the public right-of-way by the contractor without such inspection nor shall any work be commenced in dedicated easement and or public right-of-way without written authorization by the city engineer.

Performance and maintenance bonds need to be posted with the City of Wichita before construction starts.

GENERAL NOTES

- It shall be the responsibility of the subcontractors to notify all applicable utility companies who may be affected by the proposed work. The subcontractor shall make every effort to protect existing utility lines and shall repair any damages at their own expense. The subcontractors shall also coordinate their activities with other subcontractors to ensure compliance with the project schedule.
- All site concrete shall have a minimum 28 day compressive strength of 4000 psi, a slump of 4", an air content of 6% and a maximum water to cement ratio of 0.48.
- Any disturbed area not to be paved shall be seeded and mulched with Kansas Premium Fescue Blend spread at 6 - 8 pounds per 1000 SF.
