COMMUNICATION CABLE

The Contractor shall install 6 pair communication cable from the controller at Tracy and Maple to the controller at Anna and Maple. Route communication cable and messenger cable on existing RG&E pole line from northeast corner of Tracy and Maple to pole at Sta 11+65 left. Install conduit drop and route to junction box at Sta 12+04. Install cable in proposed conduit as shown on wiring diagram. This work shall not be paid for separately, but shall be considered subsidiary to the bid item "Traffic Signal Installation - Maple & Anna".

CONTROLLER DESCRIPTION

The Traffic Signal Controller shall comply with the requirements defined in the Specifications for a type 170E Controller with 470i prom module and a 400 stand alone modem. It shall be furnished and installed with a Model 332 cabinet, 3-type 242 isolator units, 10-type c800 detector units, 10 switch packs, 2-type 204 flashers, 4 flash transfer relays, and a Model 210P conflict monitor MS or ECL. The Controller shall also be furnished with WAKS Version 49A or latest version of software developed by WAKS MICRO SYSTEMS and one dial up modem, Hayes compatible.
