CONFIRMATION
MEMO

PROJECT: SOUTHLAKE 3RD ADDITION
JOB NO.:
TO: Chris Breitenstein
FROM: N. Brent Wooten
REFERENCE: Final drainage plan.
DATE: 12/3/83
COPIES TO:

Final plat is scheduled for subdivision for Dec. 22, 1983.

Proposed building locations and retention pond site are indicated on the plan. The plat will retain all of its storm water runoff within the plat, this includes the major storm flow also. No discharge will be directed to either Clarence on the east or to 45th St. on the south.

Drainage area for the plat is 18.54 acres total. As calculated in the concept plan for this plat, the required storage volume for complete retention of this site is approximately 6 Ac.Ft.

The plat is proposed to be developed with a paved driveway and parking area around the perimeter of the plat as indicated. These paved areas and the roof drains from the apartment sites will be discharged into the pond site at various points thru either pipe and inlets, flumes, or grassed swales. The actual discharge means into the pond will be determined at the time of final site development in the future.
